

Infection Prevention and Control: Check list for Health Care Facilities and Ebola Care Centers

1. Daily checks of all staff temperatures in place
2. Hand hygiene solutions (soap/water, chlorine, hand sanitizer) are widely available for both staff and patients.
3. Enough stock of PPEs (Gloves, gowns, hoods, boots, shields (or goggles), masks, apron) is available.
4. Staff wear and remove PPE properly.
5. Chlorine solution (0.5%, 0.05%) is properly prepared/used.
6. Holding space/ward is functioning; clean, not overcrowded.
7. All surfaces in patient care areas are cleaned at least daily and on discharge (beds, bed rails, and bedside tables). Floors/Toilets are cleaned every day.
8. Waste is properly managed.
