# SON-EBL-PD - Ebola: What Every Health Care Professional Should Know

### Description

This course is free and provides no CE credits for healthcare professionals. With the Ebola Virus Disease (EVD) outbreak in West Africa in 2014, health care professionals need to understand this virus as more patients in the United States are confirmed to have EVD and patients are being transported to the US for treatment. This course is designed for the healthcare worker to know the pathways of infection of humans, understand the supportive care management of hospitalized patients with EVD, and emphasize the personal safety management of caregivers. The history of the Ebola Virus Disease, methods of transmission, symptoms, diagnosis and treatment will be covered as well as hygiene, duration of infection control precautions, and health care worker protection. Because it's built using web standards, Canvas runs on Windows, Mac, Linux, iOS, Android, or any other device with a modern web browser. However, this course has not been optimized for mobile. For best viewing, use a desktop browser.
