About this Toolkit

This toolkit is also available on USB stick. To order see below.

“Community level action is an essential element in achieving equity in global health” – quote for CHGN from Professor Peter Piot, Director of Global Health, LSHTM, and co-discoverer of the Ebola virus.

The CHGN Ebola toolkit is a collection of resources that we hope will be of use to many of the organisations, agencies and individuals working to address the Ebola outbreak in English-speaking West Africa, particularly those engaged at the community-level.

The Toolkit
