Sapiens Publishing

All authors and editors have contributed to this publication on a strictly charitable basis and have received no remuneration of any kind for their contributions.

This book has been produced and published on a not-for-profit basis by the Founders of **The Global Library of Women's Medicine** (and of Sapiens Publishing) as a minor contribution to the enhancement of women's healthcare in less-resourced settings – and in loving memory of their daughter, Abigail.

Whilst this book is being made available via the normal publishing channels in the Western World, it will be supplied free to selected physicians in less-resourced countries. It can also be read entirely **free**, and in full, on the website of **The Global Library of Women's Medicine** at www.glowm.com.

Contents

The Editors	viii
The Contributors	ix
Editors' Foreword	xi
1. Gynecological history taking and examination <i>Regine Unkels</i>	1
Section I: Symptoms	
2. Vaginal bleeding in the first trimester of pregnancy <i>Bastiaan Jager</i>	21
3. Lower abdominal pain in the first trimester of pregnancy <i>Sisty J. Moshi</i>	35
4. Hyperemesis gravidarum <i>Shipra Sonkusare</i>	40
5. Acute pelvic pain in a limited-resource setting <i>Abubakar Danladi</i>	53
6. Chronic pelvic pain <i>Vanessa Sangala</i>	66
7. Painful menstrual period: dysmenorrhea <i>Regine Unkels</i>	79
8. Amenorrhea <i>Marieke Lagro</i>	84
9. Abnormal uterine bleeding in the premenopausal period <i>Heleen van Beekhuizen</i>	91
10. Uterine bleeding in the postmenopausal period <i>Heleen van Beekhuizen</i>	96
11. Abdominal masses in gynecology <i>Pubudu Pathiraja</i>	100
Section II: Specific benign conditions	
12. Ectopic pregnancy <i>Pascal R. Kolk</i>	115
13. Abortion <i>Charles A. Ameh</i>	123

GYNECOLOGY FOR LESS-RESOURCED LOCATIONS

14. Recurrent miscarriage including cervical incompetence <i>Tracy Yeung and Lesley Regan</i>	134
15. Contraception <i>Douwe A.A. Verkuyl</i>	147
16. Subfertility <i>Heleen van Beekhuizen and Sanjeev Sharma</i>	170
17. Sexually transmitted infections and reproductive tract infections <i>Claudia Hanson and Thérèse Delvaux</i>	183
18. HIV/AIDS-related problems in gynecology <i>Regine Unkels</i>	200
19. Uterine fibroids <i>Regine Unkels</i>	212
20. Treatment of dysfunctional abnormal uterine bleeding <i>Heleen van Beekhuizen</i>	229
21. Vesico-vaginal and recto-vaginal fistula <i>Brian Hancock</i>	233
22. Female genital mutilation <i>Hassan Azadeh and Moustapha Touré</i>	275
23. Pelvic organ prolapse and incontinence <i>Mark E. Vierhout and Kirsten B. Kluivers</i>	285
24. Gynecology in children and adolescents <i>Heleen van Beekhuizen</i>	295
25. Benign disease of the breast <i>Eva J. Kantelhardt</i>	302
Section III: Specific malignant conditions	
26. Cervical cancer prevention and treatment in low-resource settings <i>Lynette Denny</i>	317
27. Molar pregnancy and other gestational trophoblastic diseases <i>Heleen van Beekhuizen</i>	337
28. Ovarian cancer <i>Nomonde Mbatani</i>	344
29. Cancer of the uterine corpus <i>Robbert Soeters</i>	356
30. Breast cancer <i>Regine Unkels and Eva J. Kantelhardt</i>	367
31. Basic oncology including treatment in less-resourced locations <i>Suresh Kumarasamy</i>	391

32. Palliative care 407
Anne Merriman and Rose Kiwanuka

Section IV: Basic program skills

33. Epidemiology in gynecological diseases 425
Sisty J. Moshi
34. Quality improvement and clinical audits 435
Baltazar J. Ngoli
35. Management of low-cost drugs and equipment 456
Carine Werder
36. Gynecological care and the health system 465
Claudia Hanson
- Index 477

The Editors

Heleen van Beekhuizen, MD, PhD has spent 8 years working in low-resource settings, in particular, Papua New Guinea and Tanzania. She has a keen interest in minimal invasive gynecological surgery, vesico-vaginal fistula surgery and (oncological) gynecology in low-resource settings.

Currently, she is employed as an oncological gynecologist and general gynecologist at the Erasmus Medical Center and Haven Hospital in Rotterdam, The Netherlands, and she is pursuing a master's in Clinical Trials at the London University (London School of Hygiene & Tropical Medicine).

Regine Unkels, MD, OB/GYN, MPH, DTM&H is a specialist in obstetrics and gynecology with a master's degree in public health. She has worked as a clinician and researcher in Burkina Faso and in Tanzania in rural settings.

Her special interests are in emergency obstetric care, gynecological morbidity, access to reproductive healthcare, service integration and linkage of HIV and reproductive healthcare, and capacity building of health providers.

She is currently working as a clinical lecturer in Maternal and Newborn Health at the Liverpool School of Tropical Medicine.

Editors' Foreword

It is estimated that approximately 1.2 billion women worldwide live in less-resourced locations and many of these women have little or no access to good-quality gynecological care. For such women there is, therefore, a significant need for evidence-based, cost-effective medical care. Unfortunately, however, most gynecological textbooks describe diagnostic and treatment schemes unsuitable for areas with limited resources.

This carefully structured textbook seeks to support various levels of health personnel (e.g. junior gynecologists, general doctors, midwives, clinical officers, nurses at MCH clinics etc.) in less-resourced locations by providing evidence-based information about low-tech diagnostic and treatment options for common gynecological conditions such as cervical, ovarian and breast cancer, problems in early pregnancy, contraception and gynecological bleeding disorders. It also covers specific conditions often encountered in less-resourced locations such as fistula surgery, female genital mutilation and HIV-associated gynecological complications. A separate chapter deals with subfertility, a topic which is rarely on the agenda of vertical programs in less-resourced locations although the need for appropriate care for this condition is substantial.

Each chapter presents differential diagnosis and management plus a section on prevention and community sensitization. Many chapters also feature links to relevant online videos of gynecological procedures.

The first part of the book presents a symptom-orientated approach to diagnosis whilst the second part of the book focuses on specific conditions with detailed guidance on treatment. The third part deals with gynecological cancer in less-resourced locations. The fourth and final part of this book addresses important basic skills for program planning and monitoring and is designed to provide guidance on quality assessment and auditing, important factors in improving gynecological care in places with low-resource tools.
