

## Enteric Disease Bacteriology Kit

This module is only sent when laboratory able to use this material is identified.

| Code | Item                                                                     | Quantity |
|------|--------------------------------------------------------------------------|----------|
|      | Culture swab ,Cary Blair (prepared transport medium + rectal swab)       | 50       |
|      | TCBS medium , pk/500g                                                    | 1        |
|      | Tryptose, pk/500mg                                                       | 1        |
|      | Sodium Taurocholate, pk/250g                                             | 1        |
|      | Gelatin, pk/250g                                                         | 1        |
|      | Potassium Tellurite, pk/25g                                              | 1        |
|      | Sodium Deoxycholate, pk/25g                                              | 1        |
|      | Tetramethyl-p-phenylenediane Hydrochloride, pk/5g                        | 1        |
|      | Kliger Iron Agar, pk/500g                                                | 1        |
|      | Nutrient Agar, pk/500g                                                   | 1        |
|      | Cholera diagnostic Antiserum polyvalent O, Group 1, pk/2ml               | 5        |
|      | Peptone culture medium, Bacto, pk/500g                                   | 1        |
|      | Petri dishes 90mm polystyrene sterile, pk/500                            | 1        |
|      | Test tubes 13 x 100mm, pk/100                                            | 1        |
|      | Disposable Bijou bottles 7 ml, polystyrene with polyethylene cap, pk/700 | 2        |
|      | Desoxycholate lactose agar, pack of 500 g                                | 1        |
|      | Kligler iron agar, pack of 500 g                                         | 1        |
|      | Lysine iron agar, pack of 100 g                                          | 2        |
|      | Motility indole ornithine medium, pack of 500 g                          | 2        |
|      | Acetate differential agar, pack of 500 g                                 | 1        |
|      | Box, hinged, 2 x 24 racks, pack of 5                                     | 4        |
|      | Needle, inoculate                                                        | 2        |
|      | Needle holder                                                            | 2        |
|      | Loop, inoculate, 24GA 3mm, pack of 12                                    | 2        |
|      | Burner, alcohol                                                          | 1        |
|      | Alcohol anhydrous, reagent, pack of 500 ml                               | 1        |
|      | Salmonella O antiserum poly C, 3 ml                                      | 2        |
|      | Salmonella O antiserum poly D, 3 ml                                      | 1        |
|      | Shigella antiserum poly GRP A, 3 ml                                      | 1        |
|      | Shigella antiserum poly GRP B, 3 ml                                      | 1        |
|      | Shigella antiserum poly GRP C, 3 ml                                      | 1        |
|      | Shigella antiserum poly GRP D, 3 ml                                      | 1        |
|      | Tube, culture, rimless, 16 x 125 mm, pack of 72                          | 2        |
|      | Cap, Uni-flex, white, 16 mm, pack of 1000                                | 1        |
|      | Tube, culture, screw cap, 13 x 100 mm, pack of 144                       | 3        |
