

# WHO e-Pocketbook of Hospital Care for Children

iOS Universal [Medical](#)

The WHO e-Pocketbook provides up-to-date, evidence-based clinical guidelines for children requiring hospital care. It is the electronic version of the widely used Pocket book of Hospital Care for Children [Blue Pocketbook].

Designed for doctors, nurses and other health workers responsible for the care of children, these guidelines focus on the management of major causes of childhood mortality in developing countries, including:

- Neonatal illness, including low birth weight, prematurity, sepsis, perinatal asphyxia, and congenital anomalies
- Pneumonia and other breathing problems, including bronchiolitis, asthma and tuberculosis
- Diarrhoea, acute and chronic
- Fever, including malaria, meningitis, septicaemia and

rheumatic fever
