Session 1 Scenario 1A Session 1 Quiz

Question 1 of 4

When providers discuss side effects with clients they should:

Be truthful – tell them about the potential side effects associated with method use but also explain that not everyone experiences any, or all, of the side effects and most reduce, or go away completely, with time

Try to scare the client from using the method – as they will likely discontinue using it anyways

Present the myths

Mos... in m...
