**Health Facilities Inventory**

**July 2012**

## FOREWORD

This inventory of health facilities in Uganda has been prepared by the Ministry of Health, Department of Clinical Services based on information provided by the District Health Offices of all districts and / or Chief Administrative Officers of the respective districts, between October 2011 and July 2012. The inventory shows the stock of Health Units in the Country by location, level, ownership and status of functionality.

Updated data on health facilities in the country was obtained from 91 districts out the 112 districts. In this publication, the inventory for districts which failed to submit the required information has been maintained as it was in the previous publication of May 2011.

The Health Facilities inventory is presented in three volumes on the basis of ownership:

- Volume I: Government owned Health Facilities
- Volume II: Private not for Profit Organisations' owned Health Facilities
- Volume III: Privately owned Health Facilities

The principal purpose of compiling this inventory is twofold:

1. To reflect the current stock and distribution of health facilities in the country as a guide for locating and/or siting of new Health Units. It is intended that new construction shall be directed to the underserved areas
2. To enable effective planning for staffing and rational distribution of medicines and supplies

The Ministry is cognisant of the continued development of new health facilities as well as the upgrading of existing facilities in the country. The Health Facilities Inventory will therefore be updated annually to capture new developments. Districts are therefore urged to provide annual updates of the new, upgraded or decommissioned health facilities for the above purposes.

Further information about the inventory may be submitted to or obtained from the Assistant Commissioner for Health Services (Health Infrastructure), Department of Clinical Services Ministry of Health Headquarters. Tel. 070/71/77 2 406880; Email: [ssbwanda@gmail.com](mailto:ssbwanda@gmail.com); [sam.wanda@health.go.ug](mailto:sam.wanda@health.go.ug)

I take this opportunity to thank all those who have contributed towards publication of this updated Health Facilities Inventory (2012) and hope that the Inventory will be useful in effective planning for health service delivery in the country.

Dr. Jane Ruth Aceng  
**DIRECTOR GENERAL OF HEALTH SERVICES**

## 1.0 INTRODUCTION

This Health Facilities Inventory has been compiled from information provided by districts through the offices of the District Health Officers, verified by the Resident District Commissioners and / or the Chief Administrative Officers. It covers all the 112 districts of the country.

The report has been compiled to: -

- i. Provide information on the current stock of health care facilities by location, level, ownership and status of functionality as of June 2012.
- ii. Enable identification of underserved areas and thereby provide a guide for locating and/or siting of new Health Units. It is intended that new construction shall be directed to the underserved areas.
- iii. To guide effective planning for staffing and rational distribution of medicines and supplies

## 2.0 NOMENCLATURE OF HEALTH FACILITIES

Health facilities in Uganda are classified into seven levels based on the services they provide and the catchment area they are intended to serve. The health facilities are designated as Health Centre level one (HC I) to Health Centre Level four (HC IV); General hospital, Regional Referral hospital and National Referral hospital. The respective services provided at each of the levels and the desired catchment area / populations are as in Table 1.

**Table 1: Service Delivery by Level of Health Facility.**

Level of Health Unit	Target population	Services provided
Health Centre I (Village Health Teams)	1,000	Community based preventive and Promotive Health Services. Village Health committee or similar status.
Health Centre II	5,000	Preventive, Promotive and Outpatient Curative Health Services, outreach care, and emergency deliveries.
Health Centre III	20,000	Preventive, Promotive, Outpatient Curative, Maternity, inpatient Health Services and Laboratory services.
Health Centre IV	100,000	Preventive, Promotive Outpatient Curative, Maternity, inpatient Health Services, Emergency surgery and Blood transfusion and Laboratory services.
General Hospital	500,000	In addition to services offered at HC IV, other general services will be provided. It will also provide in service training, consultation and research to community based health care programmes.
Regional Hospital	2,000,000	In addition to services offered at the general hospital, specialist services will be offered, such as psychiatry, Ear, Nose and Throat (ENT), Ophthalmology, dentistry, intensive care, radiology, pathology, higher level surgical and medical services.
National Hospital	10,000,000	These provide comprehensive specialist services. In addition, they are involved in teaching and research.

## 3.0 STATUS OF HEALTH FACILITIES

The status of health facilities has been classified into four categories namely: **Functional, Unfunctional, Completed and under construction**. Functional refers to facilities that have been operating as of June 2012; Unfunctional refers to facilities that have the basic infrastructure but are not operational for reason such as conflict, lack of staff and equipment,

and for which there is plan to operationise them in financial year 2012/13; Completed facilities are those which were not operating by June 2012 due to lack of either medicines or staff but are ready to start operations in the financial year 2012/13; while units that are indicated to be under construction are those that are still being developed and shall not carry out service delivery operations in the financial year 2012/13.

#### **4.0 GENERAL GUIDELINE FOR ESTABLISHMENT OF NEW HEALTH FACILITIES**

The Policy on Health Infrastructure Development is to provide a network of functional, efficient and sustainable Health Infrastructure within walking distance (5 km) to communities. In this regard, developments should be such as to ensure that new health units are located in those areas which are underserved to attain increased accessibility while the major focus is consolidation of the existing facilities so that they can effectively deliver the services outlined in 2.0 at the respective levels.

In order to streamline future development in line with the above strategy, Guidelines for Establishment of new and Upgrading of Health Facilities have been developed which can be obtained from the Ministry of Health Headquarters at the Clinical Services Department. Districts are urged to adhere to the guidelines in all future development of health facilities.
