

Progress of selected Government Hospitals in achieving comprehensive emergency obstetric & neonatal care (CEmONC) status, July 2013

The Facility Improvement Team (FIT) assessments score selected health facilities, including Government Hospitals, on their readiness to provide quality EmONC based on whether they meet certain criteria for each of seven enablers ranging from water and sanitation to essential drugs. See over page for the details of these criteria. The criteria for a hospital is different to a community health centre (CHC) because hospitals are expected to perform complicated deliveries that need instrumental or operative procedures. Each facility is scored using the same traffic light colour system for each enabler as described on the score card for hospitals.

Performance rating	Score	Facility has:
	Green 4	Met all criteria
	Yellow 3	Mostly met criteria
	Orange 2	Partially met criteria
	Red 1	Not met criteria

Each facility is given an overall score. The image to the left shows the progress for all hospitals since the FIT assessments started based on the total scores of all enablers of the hospitals together (and expressed as a percentage).

See below for more details of how each hospital performed for each enabler using the traffic light rating and how each hospital ranked among all the hospitals assessed under the FIT.

For more details, contact Dr SAS Kargbo, Director, Reproductive & Child Health, MoHS Sierra Leone; saskargbo@yahoo.com
