Wealth quintiles:

Poorest 20%

Source: Nigeria (DHS 2003 & DHS 2013)

Coverage levels are shown for the poorest 20% (red circles) and the richest 20% (yellow circles). The longer the line between the two groups, the greater the absolute inequality. For quintiles with small sample sizes, estimates are not shown in the graphs.

O Richest 20%

Source: Nigeria (DHS 2003 & DHS 2013)

The horizontal lines connect the richest (yellow circles) and poorest (red circles) quintiles. The longer the line between the two groups, the greater the absolute inequality. For quintiles with small sample sizes, estimates are not shown in the graphs.

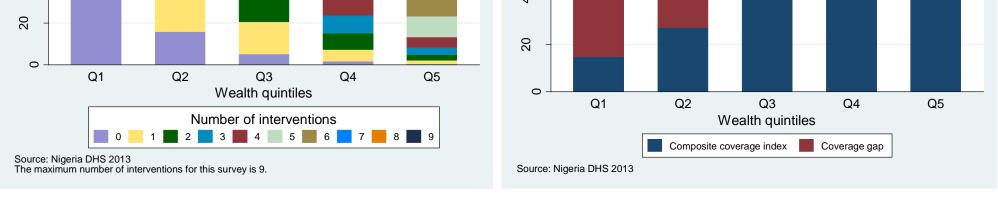

Figure 3 - Co-coverage of health interventions: percentage of children aged 1-4 yearsFigureaccording to the number of key child-survival interventions received, by wealth quintile.Figure

Figure 4 - Composite coverage of selected interventions and corresponding coverage gap (how much is needed to reach universal coverage), by wealth quintile.
