

INCLUSION and Disaster Risk Management

Mission East
- values in action

***Short review of Mission East initiatives
ICBDRM workshop July 2012***

Inclusion vs Integration

Phase 1: 2007 – 2012, *the integration*

Mission East starts to incorporate in its project portfolio (DRR, WASH and Food Security) disability friendly initiative.

(See disability friendly DIPECHO, next slides)

Phase 2: 2012-2017, *the inclusion*

- ME aiming to become inclusive organisation
- Shifting from project to program in Karnali named: **INCLUSIVE DEVELOPMENT FOR BETTER RESILIENCE and POVERTY REDUCTION**
- Mission East together with other NGOs (DCA, DPOD...) working on an alliance to promote **INCLUSIVE** and **RESILIENT** communities

Phase 1 applied to DIPECHO

Challenges:

- No valid statistic
- No knowledge on disability by local partners
- No clue how to involve people with disabilities in project

Technical Partnership with Handicap International

- Mapping of people with disabilities
- Data analysis
- Partner training
- Implementation of activities at community, district and national level

Limit of integration

- Lack of participation at design phase for people with disabilities
- Not enough project resources for specific right-base and skill learning
- Risk of increased stigmatisation by community. Why helping them? They are useless!

Identification and mapping

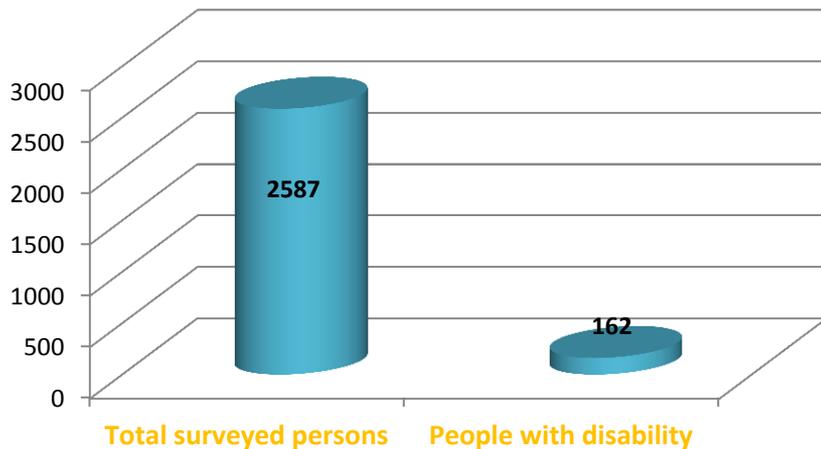

Door to door mapping in target area during vulnerability mapping

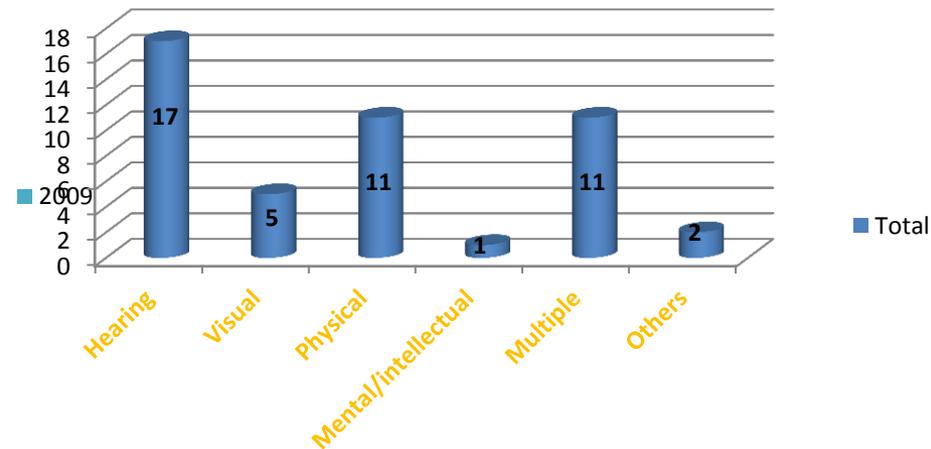

Using data collected

... For baseline survey on attitude and adaptation of dedicated activities

Number of people with disabilities 6%

Number of types of disability

Training implementing partners

Sensitise partner staff, communication skill

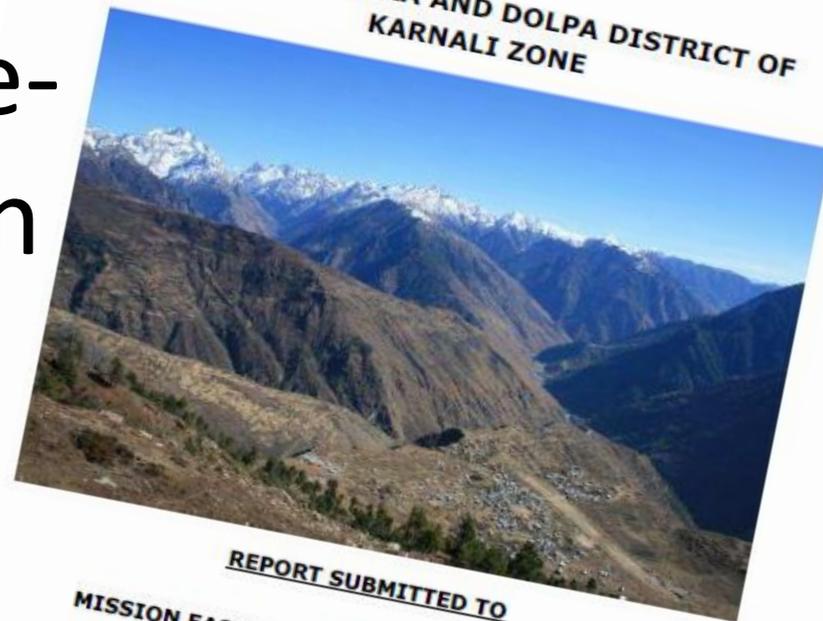

- Encouraging presence of disabled people in DRR group
- Participation in community action (training, drills...)
- Distribution of assistive device

Supporting district disability friendly pre-monsoon planning in Kalikot, Humla and Dolpa

**REPORT ON PREMOONSOON INCLUSIVE
DISASTER PREPAREDNESS PLAN
KALIKOT, HUMLA AND DOLPA DISTRICT OF
KARNALI ZONE**

JULY 2010
Kathmandu, Nepal

Contribution to national level advocacy for inclusive DRR

*DIPECHO Partners in Nepal
in collaboration with OCHA/UNAIDS*

Examples and challenges from the field of inclusion into District level DRR

In Humla, **74%** of interviewed persons with disability during screening process declared they want to participate in DRR activities.

(Presentation at National Disaster Preparedness Workshop, organised by MoHA)

Phase 2, toward inclusion for all

Inclusion of marginalised groups (disabled people, women, Dalits, People with HIV/AIDs, etc...) become central aspect of ME strategic objective for 2012-2017.

- 1st step: making our organisation inclusive
- 2nd step: shifting from project to program approach:
INCLUSIVE DEVELOPMENT FOR BETTER RESILIENCE and
POVERTY REDUCTION
- 3rd step: advocating for alliance among CSO to promote
INCLUSIVE and RESILIENT communities. Discussion
ongoing with Danish Church Aid, and DPO-Denmark...
