

Namibia Health Facility Census (NHFC) 2009

Overview of Facility-Level Infrastructure,
Resources and Systems

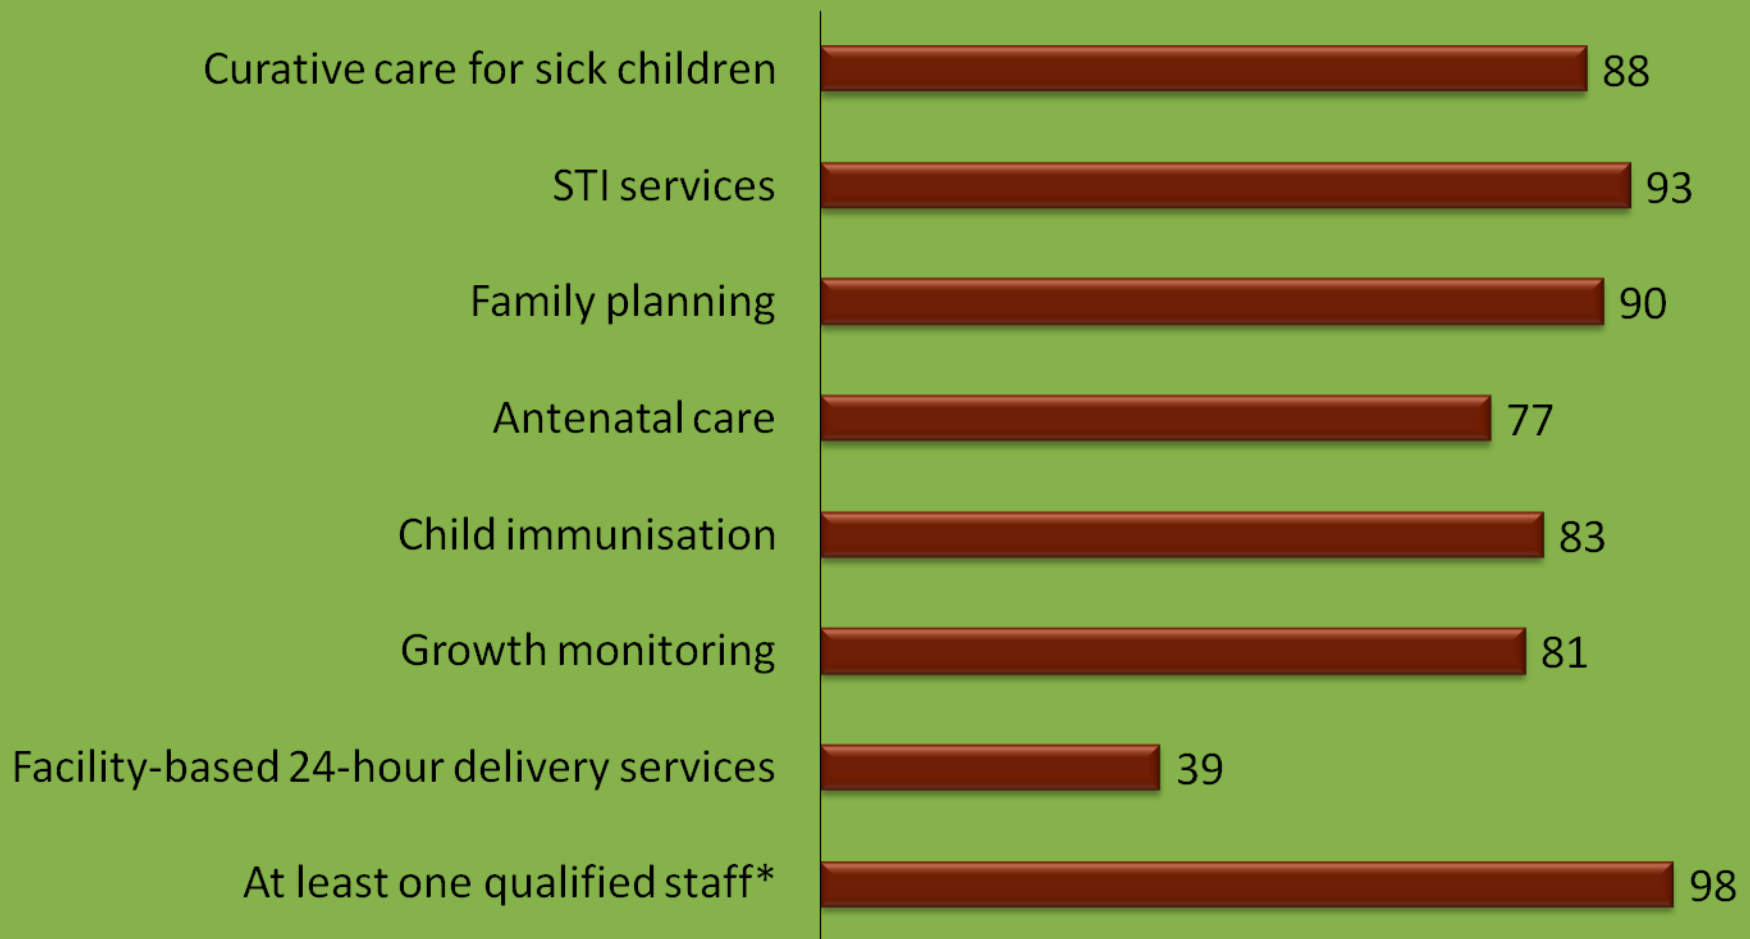

Outline

- **Basic Services**
- Infrastructure and
Emergency Services
- Management Practices
- Logistics
- Systems for Infection
Control

Availability of Basic Services

(Table A-3.1.1)

Among all health facilities (N=396)

*Qualified staff includes all specialists, medical officers, medical assistants, registered nurse/midwife, and enrolled nurse/midwives.

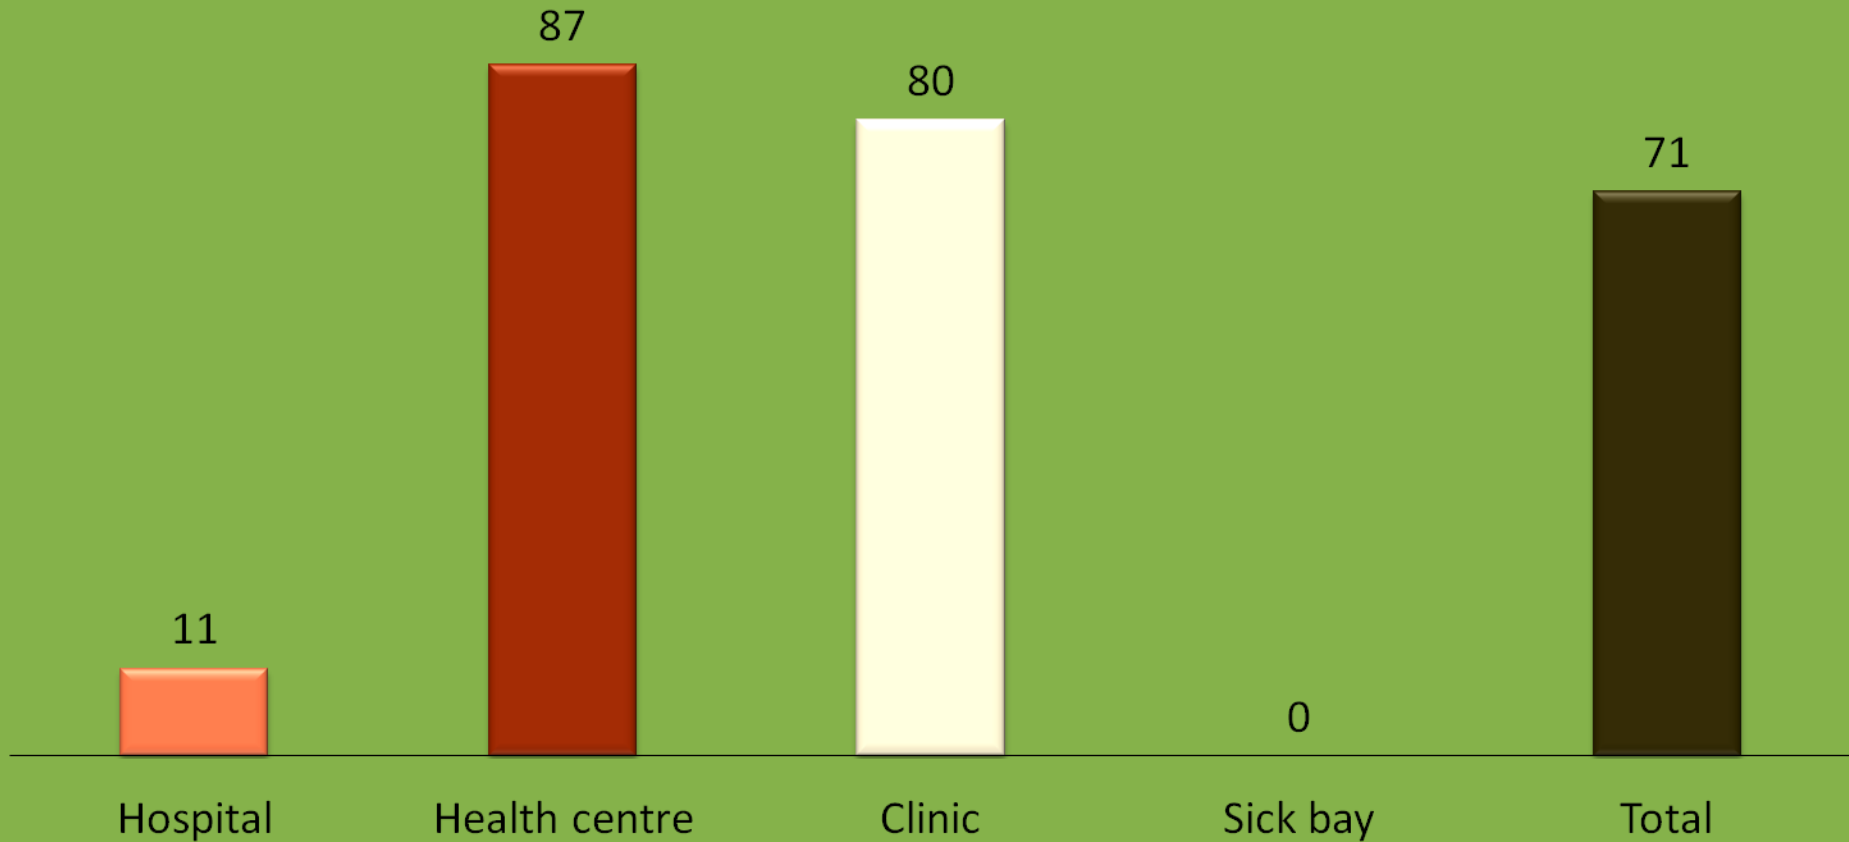

Basic Services and Minimum Frequencies

- The basic services and minimum frequencies are:
 - Outpatient curative care services for sick children 5 days/week
 - STI services 1 day/week
 - Family planning, antenatal care, child immunisation, growth monitoring 1 day/week
- If a facility has all basic services at minimum frequencies, clients will have an easier time accessing all of their health care needs in one place.

Availability of All Basic Services at Minimum Frequencies

(Table 3.1)

Among all health facilities (N=396)

Outline

- Basic Services
- **Infrastructure and
Emergency Services**
- Management Practices
- Logistics
- Systems for Infection
Control

Facility Infrastructure- Client Comfort Amenities

(Table 3.2)

Percentage of all facilities with a basic level of cleanliness (N=396)

Facility Infrastructure- Regular Water Supply

(Table 3.2)

Percentage of all facilities with year-round water supplied by tap or from a protected pump/well available within 500 meters of facility (N=396)

Facility Infrastructure- Regular Electricity or Generator

(Table 3.2)

Percentage of all facilities with electricity routinely available during service hours or a backup generator with fuel available on day of visit (N=396)

Basic Components* to Support 24-Hour Emergency Services

(Table 3.3)

Percentage of all facilities (N=396)

**At least 2 qualified providers, duty schedule, beds, 24-hour emergency communication, on-site water*

Outline

- Basic Services
- Infrastructure and
Emergency Services
- **Management Practices**
- Logistics
- Systems for Infection
Control

Routine* Management Committee Meetings

(Table 3.4)

Percentage of all facilities with observed documentation (N=396)

*At least every six months

Quality Assurance Activities

(Table 3.4)

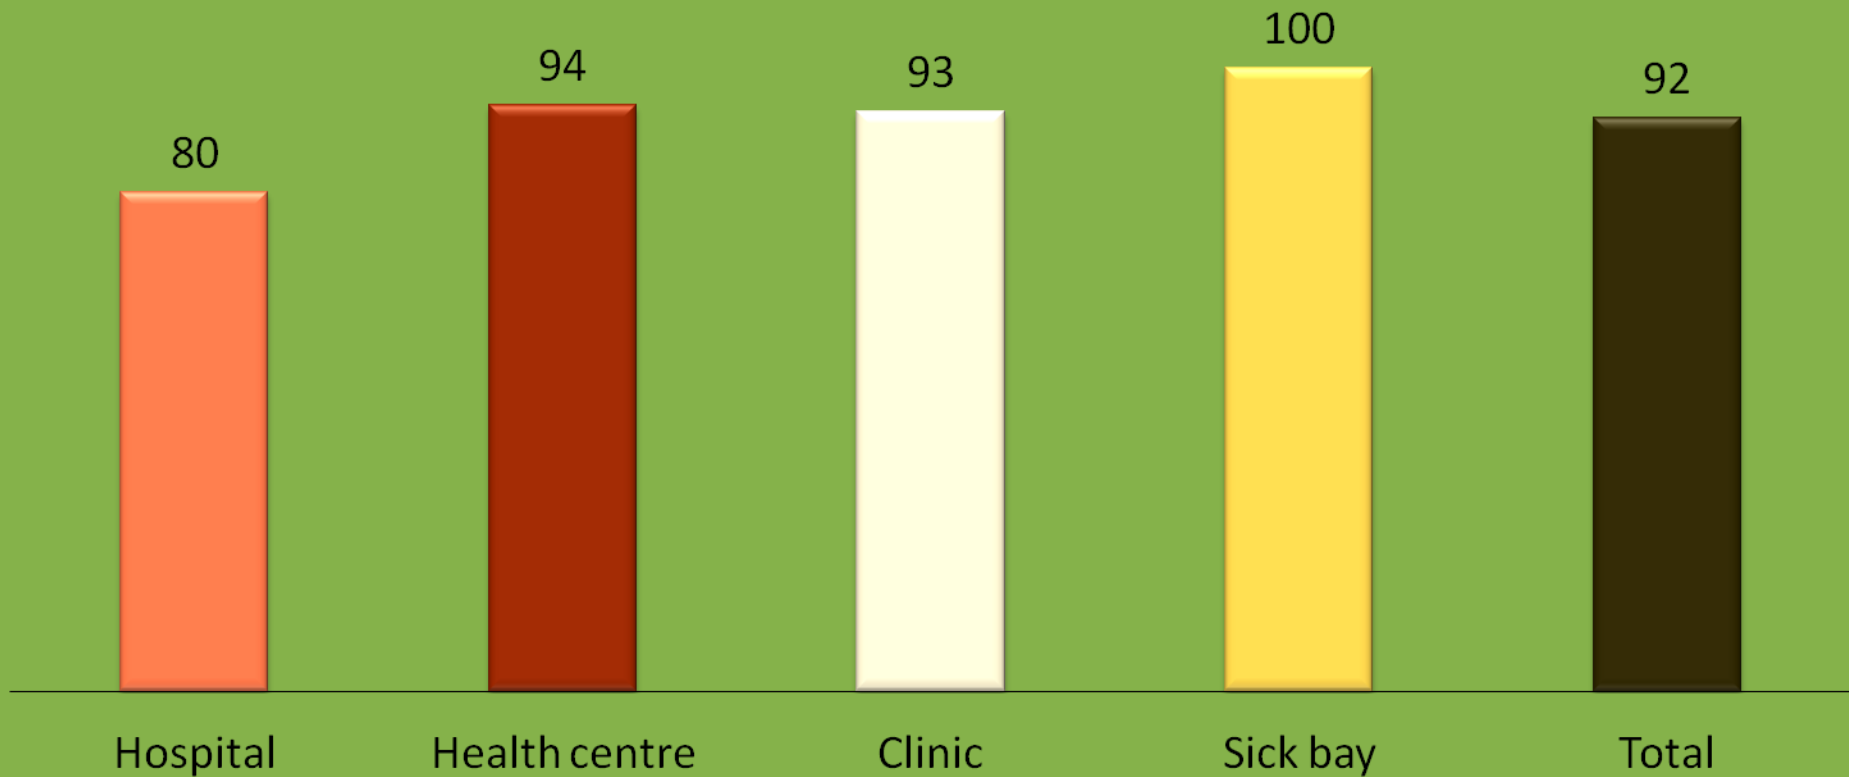

Percentage of all facilities with observed documentation (N=396)

Referrals

(Table 3.4)

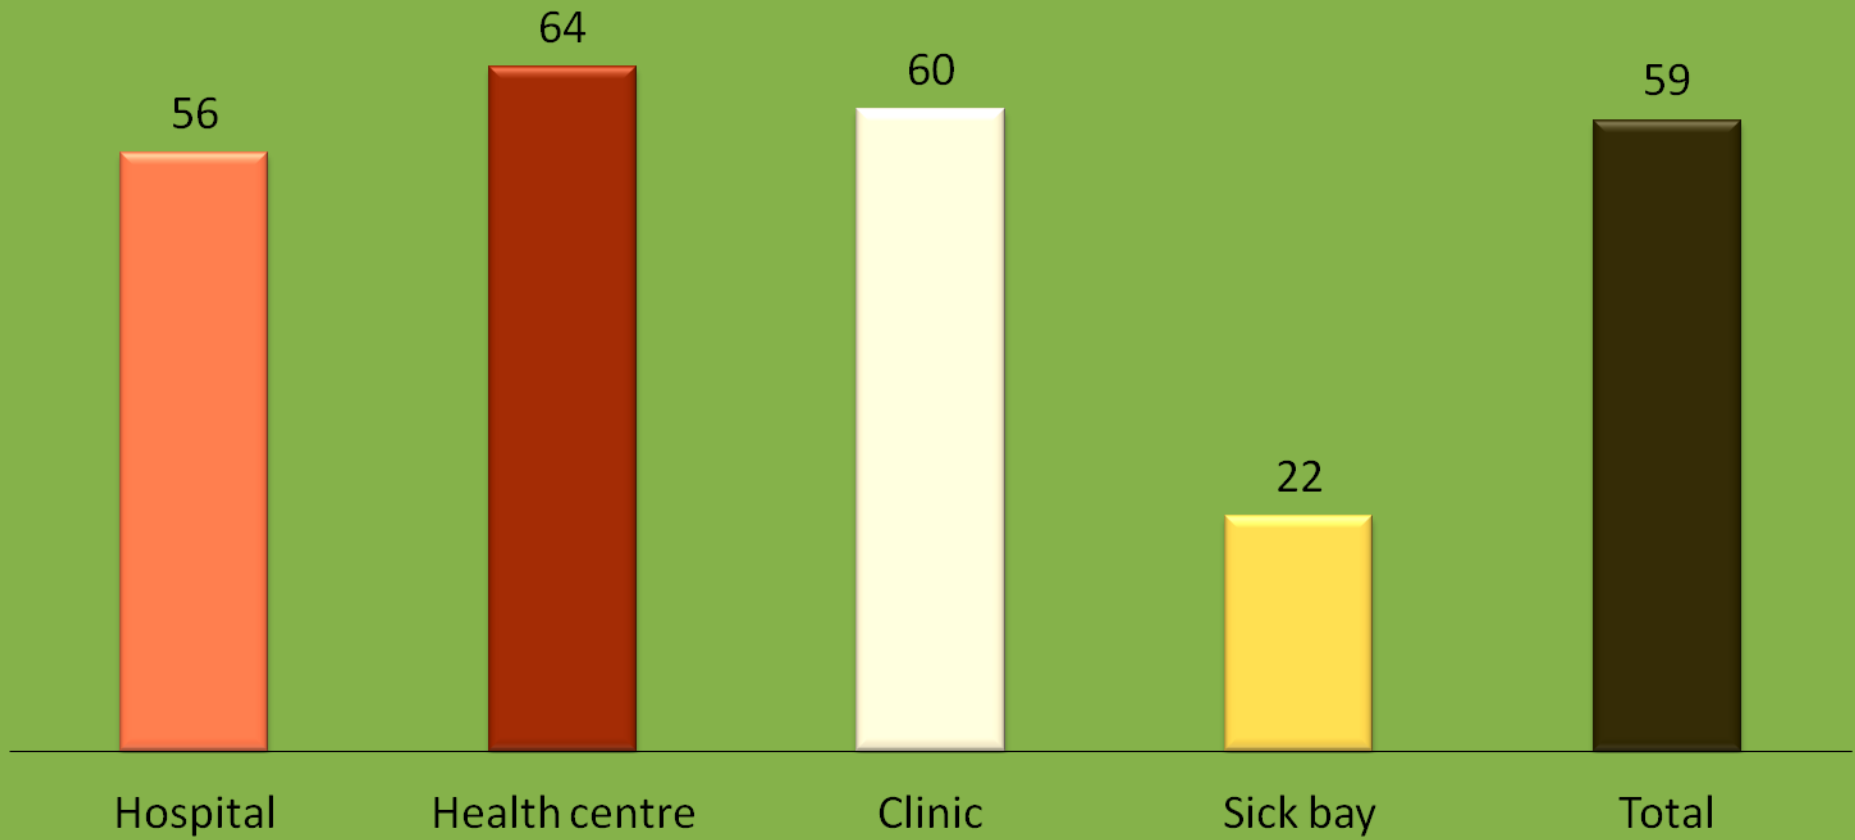

Percentage of all facilities that refer clients outside facility and had a referral form (N=396)

Supportive Management Practices*

(Table 3.5)

Percentage of all facilities (N=396)

**Supportive management practices includes an external supervisory visit during the six months before the survey and staff received routine training and personal supervision*

Management Practices Supporting Community Feedback

(Table 3.6)

Percentage of all facilities (N=396)

- Routine community participation in some management meetings
- Client opinion elicited and system for review implemented

Funding Mechanism

(Table 3.7)

Percentage of all facilities (N=396)

- Any routine user fee for adult curative care
- Any external source of revenue or funding for 2009

Outline

- Basic Services
- Infrastructure and
Emergency Services
- Management Practices
- **Logistics**
- Systems for Infection
Control

Storage and Stocking Vaccines

(Table 3.9)

Percentage of facilities with an adequate system for monitoring among facilities with stored vaccines observed (N=334)

■ Adequate cold chain monitoring system* ■ Vaccine stock*

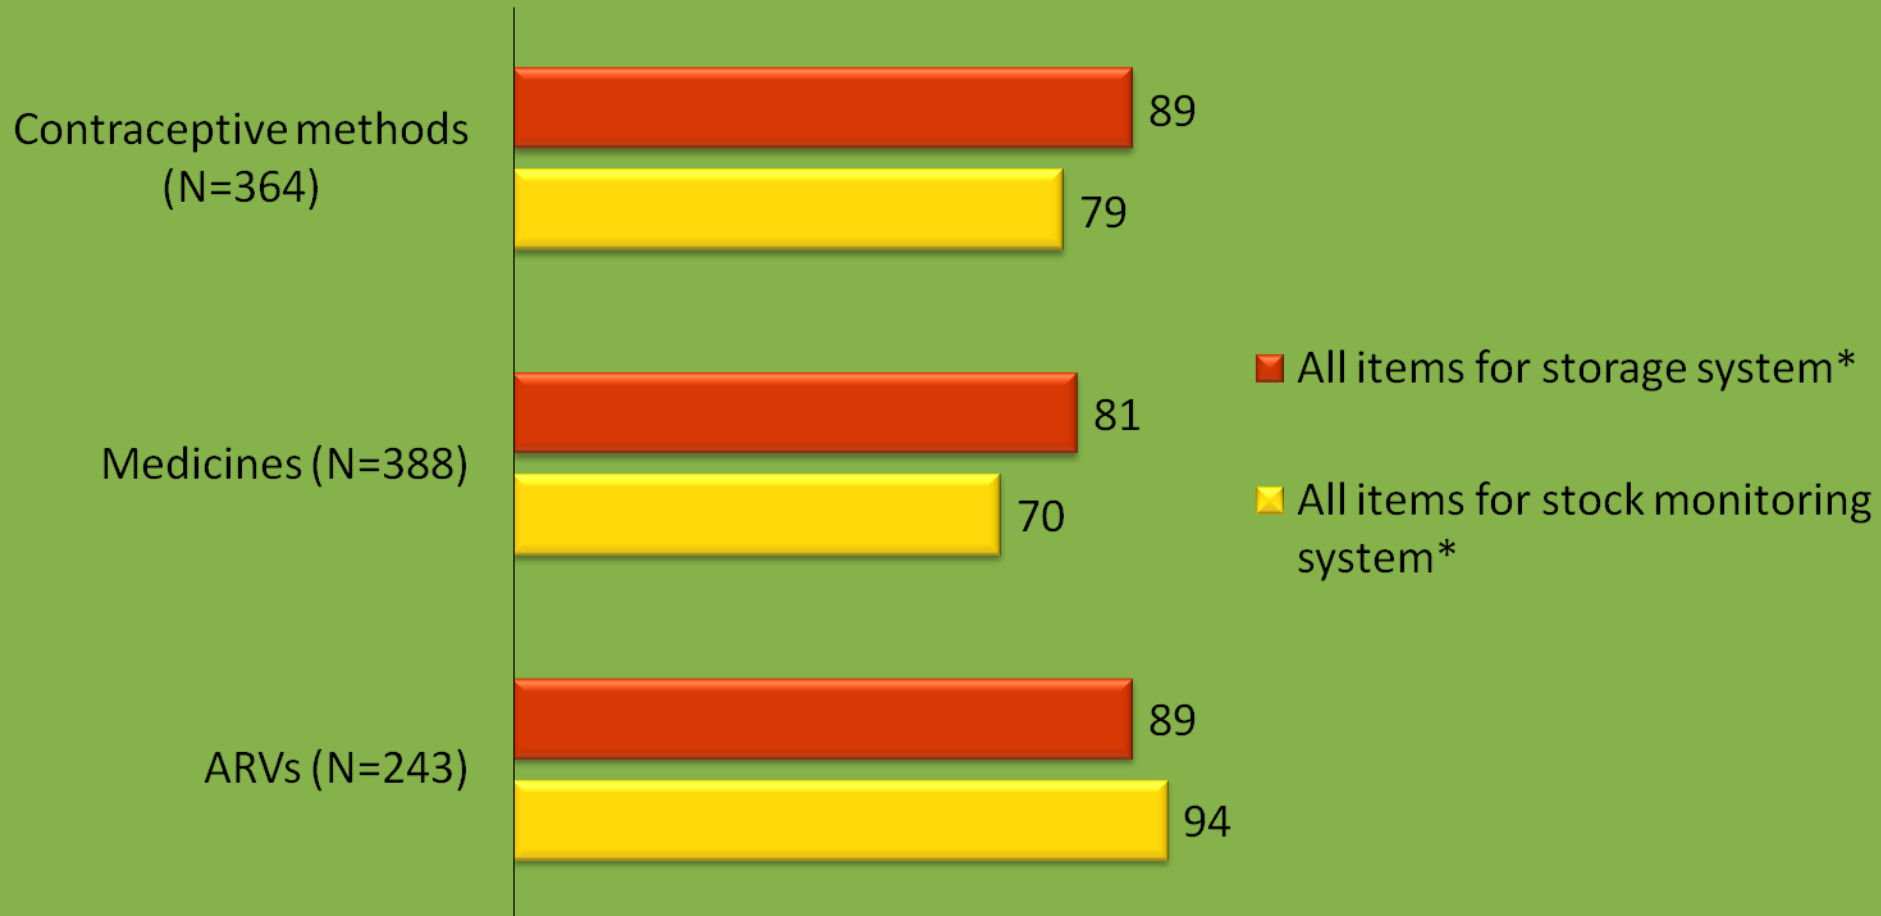

*Cold chain monitoring system is functioning thermometer in refrigerator, up-to-date temperature chart, refrigerator temperature between 2 and 8° C

*Vaccine stock is no expired items and items stored by expiration date

Storage Conditions and Stock Monitoring Systems

(Table 3.10)

Percentage of facilities that store commodities

*Storage system is: items stored in dry location, off the ground, and protected from water, sun, pests, and rodents.

*Stock monitoring system is: no expired items present and items stored by expiration date.

Outline

- Basic Services
- Infrastructure and
Emergency Services
- Management Practices
- Logistics
- **Systems for Infection
Control**

Availability of Items for Infection Control

(Table A-3.21)

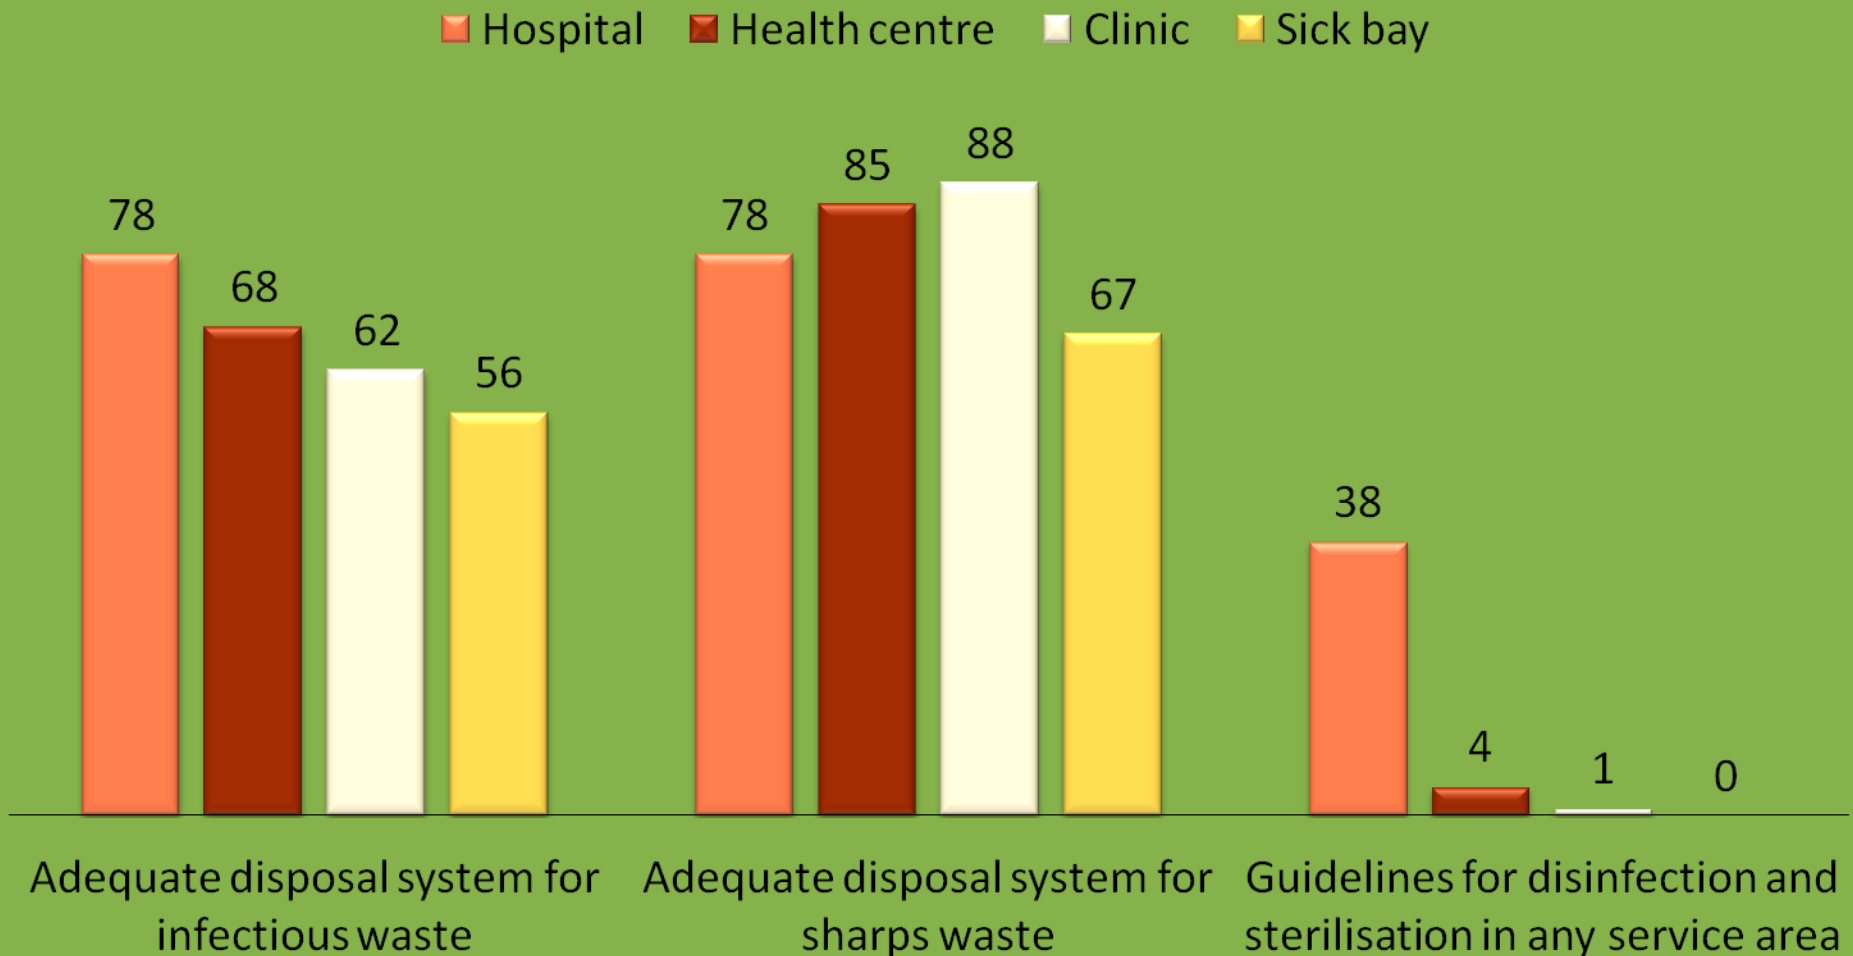

Percentage of facilities with these items in all service delivery areas (N=396)

Infection Control and Hazardous Waste Disposal

(Table 3.12)

Percentage of facilities with these items in all service delivery areas (N=396)

Key Findings

- **67%** of all facilities offer **all basic services** at **minimum frequencies**
- **57%** of all facilities have a regular **water supply** and **55%** have regular **electricity**
- **17%** of facilities have the basic components to support **24-hour emergency services**
- **37%** of all facilities have **all items for infection control**
