

Guide for providing technical support to TB laboratories in low- and middle-income countries online training

This online training is based on the Global Laboratory Initiative's "Guide for providing technical support to TB laboratories in low- and middle-income countries". This guide is intended to familiarize those who are providing technical assistance to TB laboratories in low- and middle-income countries with WHO recommendations and international best practices.

In this online training, you will be introduced to:

Module 1: Background, including an introduction to WHO-recommended testing for diagnosing TB and detecting drug resistance

Module 2: Key technical areas, for guidance including implementing quality management systems, safety in TB laboratories and linking laboratory services to TB care and treatment

Module 3: Providing technical assistance, including the types of technical assistance as well as the process for technical assistance
