

LIBERIA

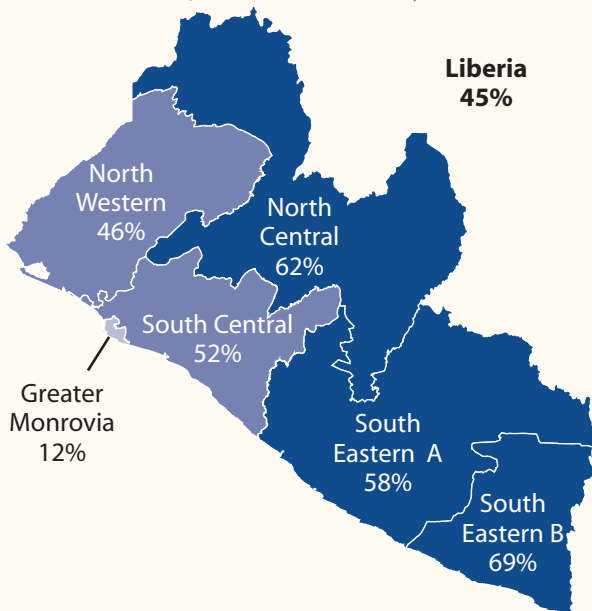

FAST FACTS FROM THE 2016 LIBERIA MIS

The 2016 Liberia Malaria Indicator Survey (LMIS) provides population-based estimates on malaria indicators to inform strategic planning and program evaluation. The 2016 LMIS is the 3rd Malaria Indicator Survey conducted in Liberia.

MALARIA PREVALENCE

Malaria Prevalence by Region

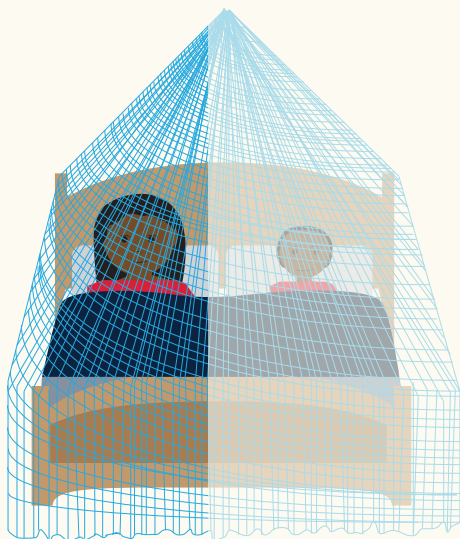

Percent of children age 6-59 months who tested positive for malaria by RDT

45% of children age 6-59 months tested positive for malaria by rapid diagnostic test.

Malaria prevalence ranges from a low of 12% in Greater Monrovia to a high of 69% in South Eastern B.

MALARIA PREVENTION

44% of children under 5 and **40%** of pregnant women age 15-49 slept under an ITN the night before the survey.

22% of pregnant women age 15-49 received 3+ doses of IPTp (and at least 1 during ANC) to prevent malaria in pregnancy.
