## European inventory of national policies for the prevention of violence and injuries

This inventory has been compiled by WHO/Europe to help facilitate monitoring and reporting of national policies for the prevention of violence and injuries, in close collaboration with national focal persons officially nominated by ministries of health and with support from the European Commission (EC).

The documents in the inventory reflect policy initiatives undertaken at national level in countries across the Region by different sectors involved in the prevention of violence and injuries, such as health, justice, interior, social affairs, transport.

Information can be viewed and searched on a country basis or in a summary table, listing all countries, by clicking one of the tabs above. This facilitates the sharing of information by Member States and comparisons across the WHO European Region.

This inventory is one of the products of a joint WHO/EC project on [preventing injury and promoting safety in Europe](#).

More information about prevention of violence and injuries can be found in the [WHO/Europe website on violence and injury prevention](#).
