WHO age-standardized estimated prevalence of smoking among those aged 15 years or more: Year 2015

These rates are modelled using all national survey data published since 1990 to estimate the underlying prevalence trends by sex, then applying age-standardization to allow comparison with other countries. They do not necessarily resemble country data from 2015. See the report for further details.

^{*&}quot;Complete" is used in this report to mean that smoking is not permitted, with no exemptions allowed, except in residences and indoor places that serve as equivalents to long-term residential facilities, such as prisons and long-term health and social care facilities such as psychiatric units and nursing homes. Ventilation and any form of designated smoking rooms and/or areas do not protect from the harms of second-hand tobacco smoke, and the only laws that provide protection are those that result in the complete absence of smoking in all public places.

Subnational laws on smoke-free environments

All subnational jurisdictions are covered by national legislation at the highest level of achievement.

 $[\]S$ A score of 0—10. Scores of 8 and above will be described in the report as high compliance, scores of 5 to 7 as medium compliance and scores below 5 as low compliance.
