

WHAT IS EBOLA?

PROTECT YOURSELF FROM EBOLA

The Ebola virus can make people very sick. It kills about one in three people who get the disease.

Ebola is passed on through close contact with sick people who has Ebola virus, and people who died from Ebola.

Wash your hands regularly with soap and water

If you have fever, diarrhoea, or vomiting, ask your family to call the community health worker or go to health centre

Do not touch sick people and people who died from sickness

Do not touch dead animals
