## E-learning Resources for Global Health Researchers

Many organizations offer no- and low-cost e-learning resources to those working in the field of global health research. [Resources](#) include training courses, MOOCs and course materials (presentations, videos, reading lists, visual aids, articles), resource centers and resource networks.

Please feel free to send additional suggested resources to [ficinfo@mail.nih.gov](mailto:ficinfo@mail.nih.gov).

Note: Fogarty provides this collection of training resources to supplement the information found on this website. These resources are not produced by Fogarty and we cannot guarantee the accuracy of information provided on external websites.
