Dr Dixon Chibanda at the World Economic Forum in Davos

Our mission is to close the treatment gap for people living with mental, neurological and substance use disorders in low resource settings

Selected Research Projects

African Mental Health Research Initiative (AMARI)

Building an Africa-led network of future leaders in mental, neurological and substance use research

The Friendship Bench

Uses a brief psychological approach based on problem-solving therapy carried out by lay health workers

INTREPID II: International Research Programme on Psychoses In Diverse Settings

Research on psychotic disorders in India, Nigeria, and Trinidad.

PRIME: Programme for Improving Mental Health Care

Implementation and scale up of treatment programmes for priority
mental disorders in primary and maternal health care in low resource
settings
