

Ethics in epidemics, emergencies and disasters: Research, surveillance and patient care

Duration:

The estimated time commitment for this course is between 8 - 10 hours.

Progress is automatically saved for each module so the course does not have to be completed in one attempt.

Certification:

A certificate is issued once a minimum of 80% is achieved in the final quiz for each module

Background:

This e-learning course has been adapted entirely from the WHO training manual 'Ethics in epidemics, emergencies and disasters: Research, surveillance and patient care' that can be accessed and downloaded from the following website:

<http://who.int/ethics/publications/epidemics-emergencies-research/en/>

The training manual was the result of the collaboration of the WHO Global Health Ethics Unit (GHE) in the Department of Knowledge, Ethics and Research (KER), the Department of Emergency Risk Management and Humanitarian Response (ERM) and the Department of Pandemic and Epidemic Diseases (PED). The development of the manual was led by Andreas Reis (GHE) with assistance from Abha Saxena, Coordinator GHE, and Jonathan Abrahams, ERM department.

Recognition

This e-learning course is formally recognised for its quality and content by the following organisations and institutions:

Enabling research by sharing knowledge
