Ebola[e]Education

About this course

The Ebola[e]Education course is developed to provide all healthcare workers with free access to comprehensive information on the Ebola virus. The first version of the module was written by Dr Jerald Sadoff (JnJ) in 2014 and is updated in 2019 by Dr Galit Alter. The course consist of one module, which provides information on the history of the Ebola virus, diagnosis and treatment. In addition the module covers topics such as transmission pathways and vaccines.
