

Planetary Health Education

Welcome

Planetary health education has been rapidly expanding, with new courses, lecture series, degree programs, faculty positions, and cross-university initiatives emerging across the globe. The Planetary Health Alliance is dedicated to supporting these efforts, convening educators around the world to share and develop resources and forge new collaborations. Scroll down to find a wealth of open-access, globally-accessible educational resources, including general resources, resources specific to various levels of education, and resources specific to the diverse thematic areas of planetary health.

To see who's doing what, where, visit [this](#) interactive map. To get involved the international community dedicated to developing planetary health educational initiatives, join the conversation in the [planetary health education group on Hylø](#) (details on how to create a profile can be viewed [here](#)) and engage in one of the [planetary health education working groups](#).

Please contact pha@harvard.edu with any questions, feedback, or resources that you'd like to share

General Resources

As you learn about planetary health and incorporate it into your coursework, here are some resources to help you get started. Follow the links below for multimedia resources, sample syllabi, and the cross cutting principles of planetary health education. The Planetary Health Alliance is currently creating an anthology of planetary health case studies to grow planetary health educational resources. For information about the initiative, [visit here](#).
