

A microscopic image of a cell, likely a fibroblast, showing its nucleus and cytoplasm. The cell is surrounded by numerous small, bright yellow, circular structures, possibly representing viral particles or cellular components. The background is dark, making the cell and the yellow structures stand out.

# CORONAVIRUS RESOURCE CENTER

**Johns Hopkins experts in global public health, infectious disease, and emergency preparedness have been at the forefront of the international response to COVID-19.**

This website is a resource to help advance the understanding of the virus, inform the public, and brief policymakers in order to guide a response, improve care, and save lives.
