

Coronavirus Disease 2019 (COVID-19)

Check back here for updates on COVID-19 diagnosis and treatment

Coronavirus disease 2019 (COVID-19) continues to spread globally, overwhelming ICU and health system capacity. Age seems to be a risk factor for poor outcomes but questions remain about community spread, vertical transmission, and clinical manifestations of disease.

Coronavirus in New York

An interview with Michelle N. Gong, MD, MS from Montefiore Medical Center

JAMA Network

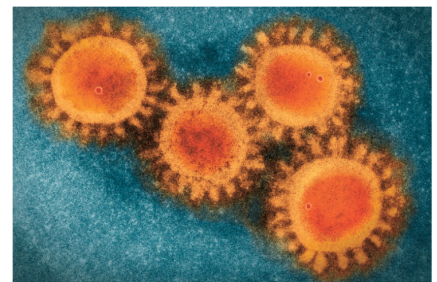

By the date of this recording New York City had nearly 11,000 confirmed COVID-19 cases, with numbers rising daily. As Chief of Critical Care Medicine at Montefiore Medical Center in the Bronx, Michelle N. Gong, MD, MS is at the center of planning for the surge of patients who will require mechanical ventilation and intensive care. In this live Q&A she discusses clinical management of ARDS, procuring diagnostic tests and personal protective equipment (PPE) for her staff, and more.
