The alcohol-based solution for hand hygiene is now part of the WHO essential medicines list .Local production of the alcohol-based handrub is an alternative to commercial products. Although adapted to contexts with limited resources, it is essential to respect the Good Manufacturing Practices to ensure the quality, efficacy and safety of the product.

If you need production sheet, checklist of the material needed etc., please click on the following link: <https://pharmed.datapharma.ch/courses...>

Pharm-Ed (www.Pharm-Ed.net) is an initiative of the Pharmacy of the Geneva University Hospitals in Switzerland. The platform is free but registration (for free) is needed to access the e-learning courses and resources.
