## Cours

### Hand hygiene

📅 12 octobre 2015 👤 Sandrine von Grünigen

- 👁 Overview
- 👤 Authors
- 📁 Resources

#### Introduction

Hand hygiene is the most effective measure to prevent the spread of germs and reduce health care-associated infections. Its implementation in health care facilities is a key component of patient safety that requires a multimodal approach. This hand hygiene module present the WHO strategy and recommendations.

#### Learning objectives

At the end of this module, you will be able to :

- ✓ Describe the importance of hand hygiene for patient safety
- ✓ Participate in the promotion of hand hygiene in your facility
- ✓ Apply the 5 moments for hand disinfection
- ✓ Implement local production of alcohol-based hand solution

#### Contenu du Cours
