

Novel Coronavirus Disease **COVID-19**

How to protect all health workers at designated hospitals?

1. **Establish a triage station at the entrance of the healthcare facility** with minimum waiting time. Ensure the healthcare facility is clearly marked with direction arrows for the triage facility.
2. **Designate a focal person** (and an alternate focal person) to manage the triage station.
3. **Direct all patients to triage area for appropriate screening and referral.**
4. **All health workers must wear minimum protective gear** (triple layered mask and hand gloves) for screening and enrolling patients.
5. At the health facility, **ensure strict adherence to respiratory and hand hygiene at all times.**
6. **Any person with cough, fever or breathing difficulty with history of travel or contact with a traveler** (from COVID-19 affected countries) **to be referred to the designated hospitals** and be made to wear a triple-layered masks while transferring to designated hospital.
7. **In case of suspected patient, inform state/district surveillance officer immediately.** Ensure a list of persons who have come in contact with the **confirmed COVID-19 patient is made and cover** name, address, date of birth, phone number.
8. **Ensure all health workers monitor their own health for symptoms of COVID-19.** Inform the designated focal person in case of symptoms, especially cough, fever or breathing difficulty. Follow the advice of the focal person.

**Stay
protected!**

**Stay safe from
Coronavirus!**
