Management of ill travelers at points of entry in the context of the COVID-19 outbreak

(ADVANCED VERSION 1.03 - 9th April 2020)

Under the International Health Regulations (IHR) 2005, public health authorities at international ports, airports and ground crossings are required to establish effective contingency plans and arrangements for responding to events that may constitute a public health emergency of international concern and to communicate with their National IHR Focal Point about relevant public health measures.

The current outbreak of novel coronavirus (COVID-19) disease has spread across borders through travelers, conveyances, which has prompted demands for the detection and management of suspected cases at points of entry (POE), including ports, airports and ground crossings, on board conveyances.

At the end of this course, you should be able to:

- outline the core capacities to be in place for managing ill travellers suspected to have COVID-19 at points of entry and on conveyances of all types;
- put in place mechanisms that facilitate the management of ill travellers suspected to have COVID-19 at points of entry and on conveyances of all types.

Target audience:

- National IHR Focal Points
- Public health authorities and operators at Points of Entry
- Conveyance operators
- Other stakeholders involved in managing public health events at Points of Entry

NOTE:

The course may be taken without a user account. However, a certificate of completion is available if you take the course with a user account and if your total score is above 80%.

If needed, click on "Register " to create a user account (external partner) and then sign in before taking the course.

Note:

(22/04/20) Please note that due to current cyber-attacks targeting WHO, the ADS login for non-WHO users (to be able to access the platform) has been temporarily shut down. As of now, until further notice, non-WHO users will be able to access most of the existing online courses without user account. As this type of access is anonymous, no grade will be saved and therefore no certificate of completion could be issued. Apologies for the inconvenience.
