

Fighting COVID-19 through hygiene: share your expertise and get your questions answered

The COVID-19 Hygiene Hub is a free service to help actors in low- and middle-income countries rapidly **share**, **design**, and **adapt** evidence-based hygiene interventions to combat COVID-19.

We bring together technical experts and resources, governments, international agencies, and NGOs for effective hygiene programming

Maintaining good hygiene is one of the most important things in fighting the spread of COVID-19. The Hygiene Hub brings together governments, international agencies, and NGOs along with leading experts in public health, behaviour change, and implementation science to enable effective hygiene programmes that curb human-to-human transmission of the novel coronavirus (SARS-CoV-2) responsible for COVID-19 in homes, communities, schools, health care facilities, and other public spaces.

Click on the blue pins above to find out more about **what organisations and governments are doing** in different regions of the world.

Do you have COVID-19 responses, initiatives, or activities that are working well? Share them with us.
