UpToDate: COVID-19 Search Intensity Monitoring

Our interactive COVID-19 search intensity map helps clinicians and public health agencies track the virus and may support clinicians in gaining predictive insights on reported cases based on clinical search activity from 1.9 million clinicians at the point of care.

[Learn more →](#)

COVID-10 Content as a Service (CaaS)

Based on UpToDate patient education content, our chat bot for patients answers frequently asked questions about COVID-19. It can be added to your patient portal, application or web site at no cost.
