

## HealthBuddy

Your very own buddy for info about COVID-19 in Europe and Central Asia.  
Just a text message away!

### Ask me about COVID-19

Hi, I'm your HealthBuddy. Send me a text in the chat window and I will give you information about the novel coronavirus from trusted sources of WHO/Europe and UNICEF ECARO.

3 steps to get started:

1. **Select your language** from the language dropdown menu at the top of this web page.
2. **Select from the list of common questions** to get quick answers.
3. **Send me your questions in natural language** as if you are talking to your friend.

The screenshot shows a chat window titled "HealthBuddy" with a close button (X) and a maximize button. The chat content includes a message from the bot: "here to provide you with trusted information on the new Coronavirus (COVID-19). So, what do you want to know?". Below this are seven buttons with the following text: "How can I protect myself?", "How to wear a mask?", "Myths about the virus", "What are the symptoms?", "Should I be worried?", "Who is most at risk?", and "Are people immune to COVID-19?". At the bottom, there is a text input field with the placeholder "Type a question..." and a send button (arrow).
