This Collection links to the websites of providers of free training. We monitor these links regularly, however if the training providers change their websites, some of these links may not work. All other resources on the Humanitarian Library can be downloaded directly from the Library.

This Collection is monitored daily to identify new and updated materials.

This Collection contains technical guidelines from leading global institutions to support the operation of medical centres responding to the Covid-19 virus. Current guidance comes from the European Center for disease prevention and control, Centre Hospitalier de Grenoble, Elsevier, Health Protection Surveillance Center, Public Health England, Stadt Essen and the World Health Organisation.

Please send suggestions for additional content for this Collection to info@humanitarianlibrary.org, or create your own Collection on the Library!

This Collection is part of an on-going series of linked Collections of operational guidance on responding to Covid-19. Some documents are available in English and French, and one resource in German.

You might find other helpful collections on supporting healthcare systems that are not specific to Covid-19 below, on WASH and the elderly or schools, health and shelter,

Cette collection est mise à jour quotidiennement pour être complétée par les tout derniers documents disponibles.

Cette Collection contient des directives techniques venant des principales institutions mondiales pour soutenir le fonctionnement des centres médicaux répondant au virus Covid-19. Les documents actuels proviennent du Centre européen de prévention et de contrôle des maladies, du Centre Hospitalier de Grenoble, de la ville d'Essen, d'Elsevier, du Health Protection Surveillance Center, de Public Health England et de l'Organisation mondiale de la santé.

Veillez envoyer des suggestions de contenu supplémentaire pour cette collection à info@humanitarianlibrary.org, ou créez votre propre collection sur la bibliothèque!

Cette collection fait partie d'une série de Collections de guides opérationnels sur la réponse au COVID-19. Certains documents sont disponibles en anglais et en français, l'un en allemand.

Vous pouvez trouver ci-dessous d'autres collections qui ne sont pas dédiées au Covid-19 ci-dessous, sur l'eau, l'hygiène et l'assainissement pour les personnes âgées et les écoles, la santé et les conditions d'abri et les chaînes d'approvisionnement en matériel de santé.

Introduction to Medical Supply Chains in Humanitarian Responses (HLA)

This collection houses all resources on Introduction to Medical Supply Chains in Humanitarian Responses in the Humanitarian Logistics Knowledge Base by the Humanitarian Logistics

Association (HLA). The resources are ordered by sub-collections, linked below, by the different perspectives on the topic.

To go back to the topic overview, click here: <https://www.humanitarianlogistics.org/knowledge/knowledge-base-pilot-lan...>

Please be aware that this collection is part of a pilot run for our Knowledge Base in Summer 2019. Contents and functionalities might change at any time. The HLA or Humanitarian Library does not advertise or endorse any specific services. Any discussion or mentioning of specific solutions by commercial and non-commercial entities are for the readers information only.

You are most welcome to contribute any feedback, ask questions, and recommend your own resources. Please direct any inquiries towards knowledge.manager@humanitarianlogistics.org

WASH and Health Guidelines

The "WASH and Health Guidelines" Collection compiles recent humanitarian practices on Water, Sanitation and Hygiene (WASH), aiming to improve the health levels of affected populations. According to European Civil Protection and Humanitarian Aid Operations, "Water, sanitation and hygiene (also known as WASH) are closely connected sectors and essential for good public health. In emergency and crisis

situations, providing access to clean water in sufficient quantities is paramount. Basic sanitation and hygiene education are important for a healthy living environment. [...].

Lack of access to clean water and to basic sanitation, and low hygiene standards increase the vulnerability of people to epidemic outbreaks." To learn more about this, visit: https://ec.europa.eu/echo/what/humanitarian-aid/water-sanitation-hygiene_en

WASH: Sanitation Resources

The "WASH: Sanitation Resources" Collection aims to support procedures that promote sanitation in humanitarian contexts. As declared by WHO Director-General, Dr Tedros Adhanom

as expressed in its constitution, as “A state of complete physical, mental, and social well-being, and not merely the absence of disease or infirmity. . . The guidelines recognize that safe sanitation systems underpin the mission of WHO, its strategic priorities and the core mission of ministries of health globally.”
