Explore COVID-19 Publications

A lot of research articles concerning SARS-CoV-2/COVID-19 are published every day. Many of them, so-called *pre-prints*, are not reviewed in a professional reviewing process at the time of publication. Others are already reviewed and published in well-known journals. Collabovid helps researchers to identify the most relevant information by using Natural Language Processing. You can search for any topic you want. Visit [search](#) to review all articles or browse a list of predefined [categories](#). For a help visit the [frequently asked questions](#).
