Faith-based health-care

Published: July 7, 2015

Executive Summary

An estimated 84% of the world's population is religiously affiliated. Faith is a powerful force in the lives of individuals and communities worldwide. This Series argues that building on the extensive experience, strengths, and capacities of faith-based organisations (eg, geographical coverage, influence, and infrastructure) offers a unique opportunity to improve health outcomes.

Comment

Faith-based delivery of science-based care

William Summerskill, Richard Horton
The Lancet, Vol. 386, No. 10005
