Basic Malaria Microscopy

The **Basic Malaria Microscopy Learner's Guide** is a World Health Organisation (WHO) publication. The WHO have very kindly granted permission for the replication of the Guide in an e-learning format.

For the purposes of presenting the Guide as an e-course it has been divided into **five parts**. Each part of the course takes **30 to 45 minutes** and must be completed in order. You can **save and exit** at any point throughout the course.

The **five quiz sections** presented at the end of each part of the course **are not** part of the Basic Malaria Microscopy Learner's Guide. They have been created by the Global Health Network to help you **test your knowledge** of the course and to gain a **certificate** to demonstrate that you have completed it. Certificates are issued on **successful completion** of all five parts of the course:

- **Part one** - comprises of **Learning unit 1 to Learning unit 3**
- **Part two** - comprises of **Learning unit 4 and Learning unit 5**
- **Part three** - comprises of **Learning unit 6 and Learning unit 7**
- **Part four** - comprises of **Learning unit 8**
- **Part five** - comprises of **Learning unit 9 and Learning unit 10**

Your feedback is greatly appreciated; please take a couple of minutes to tell us your thoughts on this course:
