

With a fast-moving pandemic, no one is safe, unless everyone is safe

The vaccines pillar of the [ACT-Accelerator](#), convened by [CEPI](#) [GAVI](#) and [WHO](#), is speeding up the search for an effective vaccine for all countries. At the same time, it is supporting the building of manufacturing capabilities, and buying supply, ahead of time so that 2 billion doses can be fairly distributed by the end of 2021.

Led by [CEPI](#) [GAVI](#) and [WHO](#).

COVAX is the vaccines pillar of the Access to COVID-19 Tools (ACT) Accelerator

The ACT Accelerator is a ground-breaking global collaboration to accelerate the development, production, and equitable access to COVID-19 tests, treatments, and vaccines. COVAX is co-led by Gavi, the Coalition for Epidemic Preparedness Innovations (CEPI) and WHO. Its aim is to accelerate the development and manufacture of COVID-19 vaccines, and to guarantee fair and

COVAX: Ensuring global equitable access to COVID-19 vaccines

equitable access for every country in the world.

Why we need COVAX

Developing a vaccine against COVID-19 is the most pressing challenge of our time - and nobody wins the race until everyone wins.

The global pandemic has already caused the loss of hundreds of thousands of lives and disrupted the lives of billions more. As well as reducing the tragic loss of life and helping to get the pandemic under control, introduction of a vaccine will prevent the loss of US\$ 375 billion to the global economy every month. Global equitable access to a vaccine, particularly protecting health care workers and those most-at-risk is the only way to mitigate the public health and economic impact of the pandemic.

What COVAX offers

- Doses for at least 20% of countries' populations
- Diverse and actively managed portfolio of vaccines
- Vaccines delivered as soon as they are available
- End the acute phase of the pandemic
- Rebuild economies
