We recently talked with Dr. Kate O'Brien, director of the Department of Immunization, Vaccines and Biologicals at the World Health Organization. We spoke with Dr. O'Brien about how the Covid vaccine works, how it gets distributed, and how we distribute it equitably.

We've disabled comments on this video. In general, we enjoy and encourage the discourse that takes place in the comment section, but this video has attracted a lot of unscientific and untrue commentary. We're not interested in providing a platform for conspiracy theories and so the comments are off. Thanks for watching!

[1:27](#) Safety questions and concerns about quick development of the vaccine.

[7:18](#) Have we entered a new age where all vaccines will be developed this easily and quickly?

[8:41](#) Questions about vaccine distribution – how's it gonna work?

[10:36](#) How do we make sure we distribute the vaccine equitably?

[11:59](#) How do we make sure all countries get the same seat at the vaccine table?

[13:29](#) What are reasonable expectations about the vaccine and life returning to "normal"?

[15:14](#) Misinformation about the vaccine

[17:00](#) Specific myths about the vaccine

[18:18](#) The bigger picture – what have we learned from this pandemic that we should apply in the future?
