ASEAN coronavirus updates (Live updates by country)

Brunei

Brunei has joined the global Covax scheme and is expecting to have the COVID-19 vaccine in Q1 2021, having sourced enough supplies to cover 50% of the population. Discussions are on-going with other suppliers.

- Brunei reported one new case on January 12, bringing the total to 174.
- Brunei saw one new case on January 7, taking the total to 173.
- The country saw 15 new cases on January 3, taking the total to 172.
- Brunei recorded five new cases on December 30, bringing the total to 157.

[Top](#)

Indonesia

Indonesia has commenced vaccinations with just over nine million doses being given to front line workers from last month. China's Sinovac is in discussions with Indonesia to provide supplies, however, the Government faces difficulties with a large population of 268 million and price sensitivity at Sinovac's estimated costs at 200,000 rupiah (US\$20) a dose. Indonesia's Health Ministry's Disease Control and Prevention Director-General Achmad Yurianto said that vaccinations would only be provided to citizens aged 18-59. The vaccine has also been required to pass halal certification prior to use and it is uncertain how the country can source enough vaccines to reach a sizeable part of its population. Australia has stated it will also provide financial support to solve these issues.

- Indonesia saw 12,568 new cases and 267 deaths on January 20, bringing the tallies to 939,948 cases and 26,857 deaths.
- Indonesia recorded 10,365 new cases and 308 deaths on January 19, bringing the totals to 927,380 cases and 26,590 deaths.
- Indonesia reported 9,086 new cases and 295 deaths on January 18, taking the totals to 917,015 cases and 26,282 deaths.
- Indonesia recorded 11,287 new cases and 220 deaths on January 17, taking the tallies to 907,929 cases and 25,987 deaths.

Laos

Laos has been trialing the Russian Sputnik V vaccine and is also in discussions with China about acquiring supplies.

- Laos saw two new cases on December 7, bringing the total to 41.
- Laos saw 14 new cases on November 25, taking the total to 39.
- The country saw one new case on November 17, taking the total to 25.
- One new case reported on October 21, taking the total to 24.
- One new case on September 12, taking the total to 23.
- Two new cases recorded on August 14, taking the total to 22.
- The country saw one new case on July 24, taking the total to 20.

Top 

Myanmar

Myanmar is seeking assistance from the Gavi and Covax programs to acquire vaccines, while Australia is also providing financial relief. At present, the Government aims to treat 20 percent of the 'most at risk' in the country with vaccines. The Government is struggling with finances and logistics and is also under US sanctions, while cases are surging. The Government has banned the celebration of Christmas

and other seasonal celebrations.

- Myanmar reported 477 new cases and 18 deaths on January 18, bringing the totals to 134,795 cases and 2,973 deaths.
- Myanmar reported 449 new cases and 13 deaths on January 17, bringing the totals to 134,318 cases and 2,955 deaths.
- Myanmar reported 491 new cases and 16 deaths on January 16, bringing the totals to 133,869 cases and 2,942 deaths.

Top 

Philippines

The Philippines aims to commence vaccinations from June 2021 and expects to inoculate about 25 million people (about 25 percent of its population) over the course of the year. The country has been badly affected by the virus and has the second-highest rate in Southeast Asia. The business community has reacted, more than 30 local companies signed an agreement to purchase at least 2.6 million vaccine doses from AstraZeneca in the country's first such deal to secure coronavirus vaccines, ten days ago. They plan to donate a large part of the doses to the government for its planned vaccination program and use the rest to inoculate their employees.

- The Philippines reported 1,862 new cases and 64 deaths on January 20, taking the totals to 505,939 cases and 10,042 deaths.
- The Philippines saw 1,357 new cases and 69 deaths on January 19, bringing the totals to 504,084 cases and 9,978 deaths.
- The Philippines reported 2,163 new cases and 14 deaths on January 18, taking the tallies to 502,736 cases and 9,909 deaths.
- The country saw 1,895 new cases and 11 deaths on January 17, bringing the totals to 500,577 cases and 9,895 deaths.

Top 

Singapore

Singapore has been working on producing its own 'Lunar' vaccine, in a joint venture between the US company Arcturus together with the Duke-NUS medical school. It is a single dose, mRNA shot, developed from genetically engineering COVID-19 genes into an otherwise harmless virus. This technique is marginally safer than other vaccines which rely on dead Covid-19 material to provoke an immune response. The vaccine is

expected to be available from Q1 2021. High-risk personnel will receive the vaccine first in a process to be determined by the government.

- Singapore recorded 40 new cases on January 20, taking the total to 59,197 amid 29 deaths.
- Singapore reported 30 new cases on January 19, bringing the total to 59,157 amid 29 deaths.
- The country saw 14 new cases on January 18, bringing the total to 59,127 amid 29 deaths.
- The country saw 30 new cases on January 17, taking the total to 59,113 amid 29 deaths.

Top 

Thailand

Thailand is currently expecting vaccines to be delivered in mid-2021. The doses would cover 13 million people in a population of about 69 million. Thailand's National Vaccine Institute signed a non-refundable advance market commitment contract worth 2.38 billion baht (US\$79 million) with AstraZeneca to reserve the supplies. Discussions are also on-going with Oxford University in the UK to secure a vaccine that could be available in Q1 if trials are completed in time.

- Thailand reported 59 cases and one death on January 20, bringing the totals to 12,653 cases and 71 deaths.
- The country reported 171 new cases on January 19, bringing the tallies to 12,594 cases amid 70 deaths.
- Thailand reported 369 new cases on January 18, taking the totals to 12,423 cases and 70 deaths.
- Thailand reported 374 new cases on January 17, bringing the tallies to 12,054 cases and 70 deaths.
- Thailand saw 230 new cases and one death on January 16, taking the totals to 11,680 cases and 70 deaths.

Top 

Vietnam

Vietnam's National Institute of Hygiene and Epidemiology (NIHE), a division of

Vietnam's Ministry of Health, has signed an agreement with Medigen Vaccine, a Taipei, Taiwan-based vaccine company to secure the supply of 3 million to 10 million COVID-19 vaccine doses in 2021. Medigen is currently conducting Phase II studies of the vaccine, co-developed with the USA's National Institutes of Health (NIH), in Taiwan and Vietnam with a view to a Q1 2021 rollout.

Vietnam is also working on producing its own vaccine, with the Institute of Vaccines and Medical Biologicals (IVAC) in Nha Trang City, partnering with New York City-based Icahn School of Medicine and the global health non-profit organization PATH. Phase 1 trials are already underway in Vietnam, while Phases 2 & 3 will be conducted at the beginning of 2021. The institute plans to submit documents for approval to the health ministry as early as April next year and claims to be capable of producing 30 million doses a year, expecting that a national vaccine could be distributed to the general population in October 2021.

- As of January 20, 2021, Vietnam's Ministry of Health confirmed a total of 1,540 cases of COVID-19. However, 1,402 of the affected patients have recovered and been discharged from hospitals. Vietnam has also recorded 35 deaths due to the pandemic.
- The country saw one new case on January 19, bringing the total to 1,540.
- As of January 18, 2021, Vietnam's Ministry of Health confirmed a total of 1,537 cases of COVID-19. However, 1,380 of the affected patients have recovered and been discharged from hospitals. Vietnam has also recorded 35 deaths due to the pandemic.
- The country saw one new case on January 16, taking the total to 1,537.
- As of January 15, 2021, Vietnam's Ministry of Health confirmed a total of 1,536 cases of COVID-19. However, 1,369 of the affected patients have recovered and been discharged from hospitals. Vietnam has also recorded 35 deaths due to the pandemic.

Other Asian countries and Regions

Afghanistan

Afghanistan faces two pandemics at the same time, Covid-19 and Polio. UNICEF is currently embarking on an urgent Polio vaccination program while the country is in talks with both China and Russia oversupplying COVID-19 vaccines. Government-imposed lockdowns increased conflict with the Taliban, and an overall lack of awareness of the disease has prevented many Afghani's from obtaining treatment of

either.

- As of January 19, Afghanistan has 54,278 cases and 2,354 deaths.
- Afghanistan has 54,141 cases and 2,346 deaths as of January 18.
- Afghanistan has 54,062 cases and 2,343 deaths as of January 17.

Top 

Bangladesh

Bangladesh will receive 68 million doses of the COVID-19 vaccine from Gavi, which is committed to ensuring at least 20 percent of populations are inoculated. Each complete dose will cost about 200 Taka (US\$2). The country is also in discussions with India concerning a further 30 million doses from the Serum Institute at about 450 Taka (US\$5). Vaccinations are expected to commence in Q1 2021.

- As of January 19, Bangladesh has 529,031 cases and 7,942 deaths.
- Bangladesh has 528,329 cases and 7,922 deaths as of January 18.
- Bangladesh has 527,632 cases and 7,906 deaths as of January 17.

Top 

Bahrain

Bahrain has begun COVID-19 vaccinations for front line personnel using a joint Chinese-UAE Sinopharm product. Roll out among the general population is expected in Q1 2021.

- Bahrain has 98,260 cases and 362 deaths as of January 19.
- As of January 18, Bahrain has 97,940 cases and 360 deaths.
- Bahrain has 97,607 cases and 360 deaths as of January 17.

Kazakhstan

Kazakhstan has been developing its own vaccines with 'Quazcovid' being admitted by the WHO as a safe candidate. These are currently undergoing trials with a roll out expected in Q2 2021.

- As of January 19, Kazakhstan has 170,098 cases and 2,349 deaths.
- Kazakhstan has 169,099 cases and 2,349 deaths as of January 18.
- As of January 17, Kazakhstan has 168,096 cases and 2,349 deaths.

[Top](#)

Kuwait

All citizens, including expatriates, will receive COVID-19 vaccines for free. Kuwait is importing one million vaccines from Pfizer, 1.7 million from Moderna, and three million doses of the Oxford-AstraZeneca vaccines and will commence a nationwide program from January.

- Kuwait has 158,822 cases and 950 deaths as of January 19.
- As of January 18, Kuwait has 158,244 cases and 948 deaths.
- Kuwait has 157,777 cases and 947 deaths as of January 17.

[Top](#)

Kyrgyzstan

Kyrgyzstan is sourcing vaccines from Russia with the Sputnik V vaccine expected to be rolled out in Q2 2021.

- As of January 19, Kyrgyzstan has 83,268 cases and 1,390 deaths.
- Kyrgyzstan has 83,178 cases and 1,387 deaths as of January 18.
- As of January 17, Kyrgyzstan has 83,109 cases and 1,384 deaths.

Top 

Lebanon

Lebanon is sourcing vaccines from Pfizer and is expected to take deliveries from mid-February 2021.

- Lebanon has 260,315 cases and 2,020 deaths as of January 19.
- As of January 18, Lebanon has 255,956 cases and 1,959 deaths.
- Lebanon has 252,812 cases and 1,866 deaths as of January 17.

Top 

Macao

Macao is part of the Covax scheme and is expected to receive 1.4 million doses of vaccine. The product will cost Pataca 300 (US\$40). Roll out is expected in late Q1 2021.

- Macao has 46 cases as of July 27.
- The number of cases has reached 45 as of July 24.
- Macao records a single infection, bringing the total to 43.

Top 

Maldives

The Maldives will receive vaccines under the Covax program and will receive enough products to reach 20 percent of its population. Roll out is expected in Q2 2021.

- The Maldives has 14,633 cases and 49 deaths as of January 19.
- As of January 18, the Maldives has 14,582 cases and 49 deaths.

- The Maldives has 14,513 cases and 49 deaths as of January 17.

Top ↕

Mongolia

Mongolia is in discussions with Astra-Zeneca to purchase COVID-19 vaccines and is also part of the Covax scheme. Roll out is expected in Q2 2021.

- As of January 19, Mongolia has 1,536 cases and two deaths.
- Mongolia has 1,526 cases and two deaths as of January 18.
- Mongolia has 1,517 cases and two deaths as of January 17.

Top ↕

Nepal

Nepal will source COVID-19 vaccines under the Covax program and will also purchase supplies from India. Roll out is expected from Q2 2021.

- As of January 19, Nepal has 267,992 cases and 1,969 deaths.
- As of January 18, Nepal has 267,644 cases and 1,965 deaths.
- Nepal has 267,322 cases and 1,959 deaths as of January 17.

Top ↕

North Korea

North Korea is expected to receive Covid-19 vaccines from China, with rumors that North Korean Leader Kim Jong-Un has already received treatment as part of medical trials.

- North Korea has reported its first case on July 25, the city of Kaesong is under lockdown.

Top ↕

Oman

Oman has sourced COVID-19 vaccines from Gavi and is buying additional supplies from Astra-Zeneca and Pfizer. Roll out will commence from January 2021 with each

shot costing 10 Rial (US\$24).

- As of January 19, Oman has 132,146 cases and 1,516 deaths.
- Oman has 132,011 cases and 1,514 deaths as of January 18.
- Oman has 131,790 cases and 1,512 deaths as of January 17.

Top ↕

Pakistan

Pakistan is also suffering from a Polio epidemic and is struggling with dealing with both. However, it has stated it will provide the vaccine for free with national inoculations to start from April 2021.

- As of January 19, Pakistan has 523,011 cases and 11,055 deaths.
- As of January 18, Pakistan has 521,211 cases and 10,997 deaths.
- Pakistan has 519,291 cases and 10,951 deaths as of January 17.

Top ↕

Palestine

Israel is currently negotiating with the UAE to provide 1.5 million doses of vaccine to Palestine. The product is expected to be the Russian Sputnik V treatment and should be available to Palestinians in Q2 2021.

- As of January 18, Palestine has 152,555 cases and 1,726 deaths.
- Palestine has 152,031 cases and 1,718 deaths as of January 17.
- Palestine has 151,569 cases and 1,700 deaths as of January 16.

Top ↕

Qatar

Qatar has signed an agreement with Moderna to provide Covid-19 vaccines and has also signed deals with Pfizer and BioNTech. These will be made available from late Q1 2021.

- As of January 18, Qatar has 147,504 cases and 248 deaths.

- Qatar has 147,277 cases and 246 deaths as of January 17.
- Qatar has 147,089 cases and 246 deaths as of January 16.

Top ↕

Saudi Arabia

Saudi Pharmaceutical Industries and Medical Appliances Corp. (SPIMACO) said last week that it had signed an agreement with the German biopharmaceutical company CureVac to provide Covid-19 vaccine. It plans to cover 70 percent of its population by the end of 2021 with treatment being available for free. The initial roll out is expected to be at the end of Q1 2021.

- Saudi Arabia has 365,325 cases and 6,335 deaths as of January 19.
- As of January 18, Saudi Arabia has 365,099 cases and 6,329 deaths.
- Saudi Arabia has 364,929 cases and 6,323 deaths as of January 17.

Top ↕

South Korea

South Korea has reached a deal with AstraZeneca to purchase its coronavirus vaccine candidate and is in final talks with global drug-makers including AstraZeneca, Pfizer Inc, and Johnson & Johnson over their vaccines. It launched a preliminary review of AstraZeneca's product in October for potential fast-track approval. Roll out is expected in Q1 2021.

- As of January 20, South Korea has 73,518 cases and 1,300 deaths.
- South Korea has 73,115 cases and 1,283 deaths as of January 19.
- As of January 18, South Korea has 72,729 cases and 1,264 deaths.

Top ↕

Sri Lanka

Sri Lanka is to receive 4.2 million doses of the COVID-19 vaccine from Gavi, enough to cover 20 percent of the population. It has not yet released information on when these will be made available.

- Sri Lanka has 54,087 cases and 270 deaths as of January 19.
- As of January 18, Sri Lanka has 53,408 cases and 270 deaths.
- Sri Lanka has 53,062 cases and 264 deaths as of January 17.

Top ↕

Taiwan

Taiwan has been developing its own vaccine and is also part of the Covax scheme. It has stated it will be able to manufacture enough of its own product for 50 percent population coverage with roll-out expected in Q1 2021.

- Taiwan has 868 cases and seven deaths as of January 19.
- As of January 18, Taiwan has 862 cases and seven deaths.
- Taiwan has 855 cases and seven deaths as of January 17.

Top ↕

Turkey

Turkey has purchased 50 million doses of China's Cornavac, manufactured by Sinopharm. These will be made available for free to the most at-risk population, inoculations start on December 11. Other treatments will be purchased and made available via medical outlets during the year and sold at cost price, and are likely to include products from Pfizer and Russia.

- Turkey has 2,399,781 cases and 24,328 deaths as of January 19.

- As of January 18, Turkey has 2,392,963 cases and 24,161 deaths.
- Turkey has 2,387,101 cases and 23,997 deaths as of January 17.

Top 

United Arab Emirates

The UAE is expected to authorize the use of China's Sinopharm vaccine which is nearing the end of its clinical trials in the Emirates. The UAE's Prime Minister, Sheikh Mohammed bin Rashid Al Maktoum was inoculated as part of the testing. Roll out is expected in Q1 2021. The UAE is also manufacturing the vaccine and hopes to produce between 75-100 million doses during the year.

- The UAE has 260,223 cases and 756 deaths as of January 19.
- As of January 18, the UAE has 256,732 cases and 751 deaths.
- The UAE has 253,261 cases and 745 deaths as of January 17.

Top 

Uzbekistan

Uzbekistan has been trailing China's Anhui Zhifei Longcom Biopharmaceutical vaccine in addition to vaccines made by China's Sinopharm and Russia's Sputnik V. Roll out is expected in Q1 2021.

- Uzbekistan has 78,091 cases and 620 deaths as of January 19.
- As of January 18, Uzbekistan has 78,036 cases and 619 deaths.
- Uzbekistan has 77,968 cases and 619 deaths as of January 17.

Top 

Yemen

Yemen is suffering from war and diseases such as diphtheria, while local politicians have made wild claims that the country will develop its own COVID-19 vaccine. It is a member of the Gavi program and relief is likely to come from humanitarian sources.

- As of January 19, Yemen has 2,115 and 612 deaths.
- Yemen has 2,113 and 612 deaths as of January 18.

- Yemen has 2,112 and 612 deaths as of January 16.
