

# COVID-19 vaccine introduction toolkit

Countries are beginning to deploy COVID-19 vaccines, bringing new hopes and challenges. WHO and other partners are working together to support countries in preparing for deployment, ensuring infrastructure is in place and the technical support available to support the process.

**The COVID-19 vaccine introduction toolbox equips all countries to develop, implement, and monitor a national deployment plan. This toolbox is intended to support national and local stakeholders.**

The toolbox is organized in line with the [Guidance on Developing a National Deployment and Vaccination Plan \(NDVP\)](#), updated as new resources become available. For questions, comments, or feedback, please contact [WHO](#).
