

How has the share of the population who would opt to be vaccinated against COVID-19 changed over time?

Survey Wave

15

(All)

Longitudinal Countries

Explore data on vaccine acceptance from 67 countries worldwide, including how acceptance has changed over time and who has the greatest potential to influence those who are vaccine-hesitant.

Learn about trends in knowledge, attitudes and practices related to COVID-19, from mask-wearing to the most trusted sources of information.

This series of visualizations will show by country, by WHO region, and by survey "wave" (every two-week period) how different audiences segmented by demographic variables responded to vaccine acceptance questions. Note the use of color throughout this series of visualizations to indicate those definitely likely to accept a vaccine, probably likely to accept a vaccine, unsure about accepting a vaccine, probably not likely to accept a vaccine, and definitely not accepting a vaccine.
