

Infection Prevention and Control (IPC) Package

Welcome

Welcome to the Infection Prevention and Control (IPC) training package. IPC is a major challenge for the world and there is a significant opportunity to reduce avoidable morbidity and mortality through care-associated infections (HAIs) and antimicrobial resistance (AMR) can be significantly reduced through IPC guidelines cover a range of topics including the core components of IPC programmes, hand hygiene, and surgical site infection.

Please [Create an Account](#) or [Log In](#) to enroll and take these courses.

In order to secure your certificate of completion for the Leadership module it is expected that you complete the module on Core Components and Multimodal Strategies. This sub-module provides an essential foundation for you as an IPC leader.
