

NATIONAL SURGICAL, OBSTETRIC and ANESTHESIA PLANNING

To achieve our vision of providing Universal access to safe, affordable surgical and anesthesia care when needed, the PGSSC is working with several Ministries of Health to develop National Surgical, Obstetric and Anesthesia Plans (NSOAP). This is a national health plan specifically focused on surgical capacity and access in a country - something which has been traditionally not present in most national health plans.

ETHIOPIA

Ethiopia's national flagship initiative-Saving Lives through Safe Surgery (SaLTS) was launched in 2016 in order to streamline all efforts towards defining a package of essential and emergency surgical care

	SaLTS Strategic Plan	M&E Framework	
	Hospital Assessment Tool	SaLTS Implementation	
	Patient Satisfaction Survey Tool	Registries	
	Financial Risk Protection Survey	KPI Training Manual	
	Hospital Assessment Tool Training Manual	KPI Training Workbook	

ZAMBIA

Zambia's National Surgical, Obstetric and Anaesthesia Plan was signed in May 2017, making Zambia a leader in creating and implementing a major policy document focused on global surgical systems

	Zambia's NSOAP	ACS Bulletin - Zambian Experience	
--	-----------------------	--	--

TANZANIA

Tanzania's National Surgical, Obstetric and Anaesthesia Plan was signed in March 2018.

	Tanzania's NSOAP	
---	-------------------------	---

NIGERIA
