A GOAL WITHOUT A PLAN IS JUST A WISH

Antoine de Saint-Exupery

In 2018, an estimated 18.1 million people were newly diagnosed with cancer. It is expected that by 2040, this number will rise to 27.5 million. This alarming trend can be reversed. Evidence-based cancer plans are essential for an effective and efficient national response to cancer control across the whole cancer continuum.

Who we

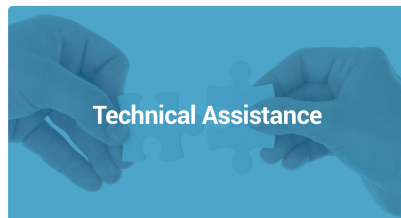

[Searching for a toolkit on how to develop a national cancer control plan \(NCCP\)?](#)

[Looking for guidance on how to implement policies](#)

The International Cancer Control Partnership (ICCP) is a group of international organisations engaged in cancer control planning efforts. The Partners are seeking to create synergies to maximize collective resources and efforts to support the development, implementation and evaluation of national cancer control plans.
