[The Farm to Fork Strategy is at the heart of the European Green Deal: making our food systems fair, healthy and environmentally-friendly.](#)

Food systems cannot be resilient to crises such as the COVID-19 pandemic unless they are sustainable. We need to redesign our food systems which too often are unsustainable, contribute to global GHG emissions, consume large amounts of natural resources, have negative health impacts (due to both under- and over-nutrition) and do not provide fair returns and livelihoods for all actors, in particular for primary producers.

Putting our food systems on a sustainable path also brings new opportunities for the food value chain. New technologies and scientific discoveries, together with growing awareness and demand for sustainable food, will benefit all stakeholders.

The Farm to Fork Strategy aims to accelerate our transition to sustainable food systems. It should:
