The *AHRO Review of Nursing (ARN)* is an international, open-access, peer reviewed, scientific journal that seeks to promote the dissemination of quality knowledge related to all spheres of nursing practice. The primary aim is to promote a high standard of clinically related scholarship which advances and supports the practice and discipline of nursing. The Journal also aims to promote the international exchange of ideas and experience that draws from the different cultures in which practice takes place. Further, *ARN* seeks to enrich insight into clinical need and the implications for nursing intervention and models of service delivery. Emphasis is placed on promoting critical debate on the art and science of nursing practice.

ARN is essential reading for anyone involved in nursing practice, whether clinicians, researchers, educators, managers, policy makers, or students. The development of clinical practice and the changing patterns of inter-professional working are also central to *ARN*'s scope of interest. Contributions are welcomed from other health professionals on issues that have a direct impact on nursing practice.

We publish high quality papers that makes important and novel contribution to the field of clinical nursing , and which demonstrate clinical application and international relevance.

Topics include but are not limited to:

- Clinical research
- Evidence-based practice
- Patients and family health and health care
- Clinical nursing leadership
- Nursing research
