About WHO ▾

Noncommunicable Diseases, Rehabilitation and Disability

We are responsible for leading, coordinating and monitoring global action to cover additional people with health services, medicines, vaccines, diagnostic and health technologies for the prevention, screening, early diagnosis and appropriate treatment of cardiovascular diseases, cancers, chronic respiratory diseases and diabetes. We aim to advance health equity for persons with disabilities, we have a focus on sensory impairments and bring together the work on rehabilitation from across the departments and from the 3 levels of the organization.
